
Section 1: 10-Q (10-Q)

**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549**

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended: September 30, 2018

TRANSITION REPORT PURSUANT TO SECTION 13 OF 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the transition period from: _____ to _____

Commission file number: 51018

THE BANCORP, INC.

(Exact name of registrant as specified in its charter)

Delaware

*(State or other jurisdiction of incorporation or
organization)*

23-3016517

(IRS Employer Identification No.)

409 Silverside Road, Wilmington, DE 19809

(Address of principal executive offices and zip code)

(302) 385-5000

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

As of November 5, 2018, there were 56,446,088 outstanding shares of common stock, \$1.00 par value.

THE BANCORP, INC. AND SUBSIDIARIES
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Structure of Company

The Bancorp, Inc. (the Company) is a Delaware corporation and a registered financial holding company. Its primary subsidiary is The Bancorp Bank (the Bank) which is wholly owned by the Company. The Bank is a Delaware chartered commercial bank located in Wilmington, Delaware and is a Federal Deposit Insurance Corporation (FDIC) insured institution. In its continuing operations, the Bank has four primary lines of specialty lending: securities-backed lines of credit (SBLOC), vehicle fleet and other equipment leasing, Small Business Administration (SBA) loans and commercial mortgage-backed loans (CMBS) generated for sale into commercial mortgage-backed securities markets primarily through securitizations. Through the Bank, the Company also provides banking services nationally, which include prepaid cards, private label banking, institutional banking, card payment and other payment processing.

The Company and the Bank are subject to regulation by certain state and federal agencies and, accordingly, they are examined periodically by those regulatory authorities. As a consequence of the extensive regulation of commercial banking activities, the Company's and the Bank's businesses may be affected by state and federal legislation and regulations.

Note 2. Significant Accounting Policies

Basis of Presentation

The financial statements of the Company, as of September 30, 2018 and for the three and nine month periods ended September 30, 2018 and 2017, are unaudited. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). However, in the opinion of management, these interim financial statements include all necessary adjustments to fairly present the results of the interim periods presented. The unaudited interim consolidated financial statements should be read in conjunction with the audited financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2017 (2017 Form 10-K Report). The results of operations for the nine month period ended September 30, 2018 may not necessarily be indicative of the results of operations for the full year ending December 31, 2018.

Revenue Recognition

The Company recognizes revenue when the performance obligations related to the transfer of goods or services under the terms of a contract are satisfied. Some obligations are satisfied at a point in time while others are satisfied over a period of time. Revenue is recognized as the amount of consideration to which the Company expects to be entitled to in exchange for transferring goods or services to a customer. When consideration includes a variable component, the amount of consideration attributable to variability is included in the transaction price only to the extent it is probable that significant revenue recognized will not be reversed when uncertainty associated with the variable consideration is subsequently resolved. The Company's contracts generally do not contain terms that require significant judgment to determine the variability impacting the transaction price.

A performance obligation is deemed satisfied when the control over goods or services is transferred to the customer. Control is transferred to a customer either at a point in time or over time. To determine when control is transferred at a point in time, the Company considers indicators, including but not limited to the right to payment for the asset, transfer of significant risk and rewards of ownership of the asset and acceptance of the asset by the customer. When control is transferred over a period of time, for different performance obligations, either the input or output method is used to measure progress for the transfer. The measure of progress used to assess completion of the performance obligation varies between performance obligations and may be based on time throughout the period of service or on the value of goods and services transferred to the customer. As each distinct service or activity is performed, the Company transfers control to the customer based on the services performed as the customer simultaneously receives the benefits of those services. This timing of revenue recognition aligns with the resolution of any uncertainty related to variable consideration. Costs incurred to obtain a revenue producing contract generally are expensed when incurred as a practical expedient as the contractual period for the majority of contracts is one year or less. The Company's revenue streams that are in the scope of Accounting Standards Update (ASU) 606 include prepaid card, card payment, ACH and deposit processing and other fees. The fees on those revenue streams are generally assessed and collected as the transaction occurs, or on a monthly or quarterly basis. The Company has completed its review of the contracts and other agreements that are within the scope of revenue guidance and did not identify any material changes to the timing or amount of revenue recognition. The Company's accounting policies did not change materially since the principles of revenue recognition in ASU 2014-09, "Revenue from Contracts with Customers" are largely consistent with previous practices already implemented and applied by the Company. The vast majority of the Company's services related to its revenues are performed, earned and recognized monthly.

Prepaid card fees primarily include fees for services related to reconciliation, fraud detection, regulatory compliance and other services which are performed and earned daily or monthly and are also billed and collected on a monthly basis. Accordingly, there is no significant component of the services the Company performs or related revenues which are deferred. The Company earns transactional and/or interchange fees on prepaid card accounts when transactions occur and revenue is billed and collected monthly or quarterly. Certain volume or transaction based interchange expenses paid to payment networks such as Visa, reduce revenue which is presented net on the income statement. Card payment and ACH processing fees include transaction fees earned for processing merchant transactions. Revenue is recognized when a cardholder's transaction is approved and settled, or monthly. ACH processing fees are earned on a per item basis as the transactions are processed for third party clients and are also billed and collected monthly. Service charges on deposit accounts include fees and other charges the Company receives to provide various services, including but not limited to, account maintenance, check writing, wire transfer and other services normally associated with deposit accounts. Revenue for these services is recognized monthly as the services are performed. The Company's customer contracts do not typically have performance obligations and fees are collected and earned when the transaction occurs. The Company may, from time to time, waive certain fees for customers but generally does not reduce the transaction price to reflect variability for future reversals due to the insignificance of the amounts. Waiver of fees reduces the revenue in the period the waiver is granted to the customer.

Sale of IRA portfolio

On July 10, 2018, the Company executed an agreement to sell and transfer the fiduciary rights and obligations related to its Safe Harbor Individual Retirement Account (SHIRA) portfolio, totaling approximately \$400 million, to Millennium Trust Company, LLC (Buyer). In consideration for the sale and transfer, Buyer paid the Company \$65.0 million, \$5.0 million of which will remain in escrow until October 10, 2019. The escrow was established as an adjunct to general representations and warranties. Because the \$65 million represented consideration for the sale and transfer of the fiduciary rights and obligations which were transferred during the quarter, the \$65.0 million was recognized as a gain on sale in the third quarter of 2018. For the nine months ended September 2018 and September 2017, the Company earned fees on the SHIRA portfolio of \$3.4 million and \$14.1 million, respectively, which is reported in the Consolidated Statements of Operations under service fees on deposit accounts. For the three months ended at those respective dates it reported \$344,000 and \$1.5 million. As a result of the sale and other third quarter income, the leverage capital ratio exceeded 9% at September 30, 2018. The fiduciary rights and obligations related to the SHIRA portfolio were unrelated to the Company's payments businesses and related accounts, which comprise the vast majority of the Company's funding.

Note 3. Stock-based Compensation

The Company recognizes compensation expense for stock options in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 718, "Stock Based Compensation". The expense of the option is generally measured at fair value at the grant date with compensation expense recognized over the service period, which is typically the vesting period. For grants subject to a service condition, the Company utilizes the Black-Scholes option-pricing model to estimate the fair value of each option on the date of grant. The Black-Scholes model takes into consideration the exercise price and expected life of the options, the current price of the underlying stock and its expected volatility, the expected dividends on the stock and the current risk-free interest rate for the expected life of the option. The Company's estimate of the fair value of a stock option is based on expectations derived from historical experience and may not necessarily equate to its market value when fully vested. In accordance with ASC 718, the Company estimates the number of options for which the requisite service is expected to be rendered. At September 30, 2018, the Company had three active stock-based compensation plans. The 2018 equity compensation plan was approved at the annual meeting in May 2018 and is described in the proxy statement for that meeting filed by the Company with the SEC. The other plans are described in the Company's 2017 Form 10-K Report.

The Company did not grant stock options during the nine month periods ended September 30, 2018 and September 30, 2017. There were 23,125 common stock options exercised in the nine month period ended September 30, 2018, and 28,500 common stock options were exercised during the nine month period ended September 30, 2017.

A summary of the status of the Company's stock options is presented below.

	Shares	Weighted average exercise price	Weighted average remaining contractual term (years)	Aggregate intrinsic value
Outstanding at January 1, 2018	1,452,625	\$ 8.30	4.64	\$ -
Granted	-	-	-	-
Exercised	(23,125)	9.45	-	-
Expired	-	-	-	-
Forfeited	-	-	-	-
Outstanding at September 30, 2018	<u>1,429,500</u>	\$ 8.28	<u>3.90</u>	<u>\$ 2,054,930</u>
Exercisable at September 30, 2018	<u>1,268,250</u>	\$ 8.45	<u>3.43</u>	<u>\$ 1,628,930</u>

The Company granted 507,792 restricted stock units (RSUs) in the first nine months of 2018 of which 440,292 have a vesting period of 2.8 years and 67,500 have a vesting period of one year. At issuance, the 507,792 RSUs granted in the first nine months of 2018 had a fair value of \$11.07 per unit. In the first nine months of 2017, the Company granted 955,024 RSUs of which 820,024 had a vesting period of three years and 135,000 had a vesting period of one year. Of the RSUs granted in the first nine months of 2017, 799,599 had a fair value of \$5.06 per unit, 7,923 had a fair value of \$6.31 per unit and 147,542 had a fair value of \$7.65 per unit at issuance.

A summary of the status of the Company's RSUs is presented below.

	Shares	Weighted average grant date fair value	Average remaining contractual term (years)
Outstanding at January 1, 2018	1,264,454	\$ 5.49	1.67
Granted	507,792	11.07	
Vested	(571,548)	5.43	
Forfeited	(9,803)	7.65	
Outstanding at September 30, 2018	<u>1,190,895</u>	\$ 7.88	1.58

As of September 30, 2018, there was a total of \$7.5 million of unrecognized compensation cost related to unvested awards under share-based plans. This cost is expected to be recognized over a weighted average period of approximately 1.6 years. Related compensation expense for the nine months ended September 30, 2018 and 2017 was \$3.0 million and \$2.4 million, respectively. The total issuance date fair value of RSUs vested and options exercised during the nine months ended September 30, 2018 and 2017 was \$3.1 million and \$2.6 million, respectively.

Note 4. Earnings Per Share

The Company calculates earnings per share under ASC 260, "Earnings Per Share". Basic earnings per share exclude dilution and are computed by dividing income available to common shareholders by the weighted average common shares outstanding during the period. Diluted earnings per share takes into account the potential dilution that could occur if securities or other contracts to issue common stock were exercised and converted into common stock.

The following tables show the Company's earnings per share for the periods presented:

	For the three months ended September 30, 2018		
	Income (numerator)	Shares (denominator)	Per share amount
	(dollars in thousands except share and per share data)		
Basic earnings per share from continuing operations			
Net earnings available to common shareholders	\$ 61,301	56,442,222	\$ 1.09
Effect of dilutive securities			
Common stock options	-	661,079	(0.02)
Diluted earnings per share			
Net earnings available to common shareholders	<u>\$ 61,301</u>	<u>57,103,301</u>	<u>\$ 1.07</u>

	For the three months ended September 30, 2018		
	Income (numerator)	Shares (denominator)	Per share amount
	(dollars in thousands except share and per share data)		
Basic loss per share from discontinued operations			
Net loss available to common shareholders	\$ (24)	56,442,222	\$ -
Effect of dilutive securities			
Common stock options	-	661,079	-
Diluted loss per share			
Net loss available to common shareholders	<u>\$ (24)</u>	<u>57,103,301</u>	<u>\$ -</u>

	For the three months ended September 30, 2018		
	Income (numerator)	Shares (denominator)	Per share amount
	(dollars in thousands except share and per share data)		
Basic earnings per share			
Net earnings available to common shareholders	\$ 61,277	56,442,222	\$ 1.09
Effect of dilutive securities			
Common stock options	-	661,079	(0.02)
Diluted earnings per share			
Net earnings available to common shareholders	<u>\$ 61,277</u>	<u>57,103,301</u>	<u>\$ 1.07</u>

Stock options for 136,500 shares, exercisable at \$10.45 per share, were outstanding at September 30, 2018, but were not included in the dilutive shares because the exercise price per share was greater than the average market price.

	For the nine months ended		
	September 30, 2018		
	Income (numerator)	Shares (denominator)	Per share amount
	(dollars in thousands except share and per share data)		
Basic earnings per share from continuing operations			
Net earnings available to common shareholders	\$ 81,477	56,309,390	\$ 1.45
Effect of dilutive securities			
Common stock options	-	775,454	(0.02)

Investments in Federal Home Loan Bank (FHLB) and Atlantic Central Bankers Bank stock are recorded at cost and amounted to \$1.1 million and \$991,000, respectively, at September 30, 2018 and December 31, 2017.

The amortized cost and fair value of the Company's investment securities at September 30, 2018, by contractual maturity, are shown below (in thousands). Expected maturities may differ from contractual maturities because borrowers have the right to call or prepay obligations with or without call or prepayment penalties.

	Available-for-sale		Held-to-maturity	
	Amortized cost	Fair value	Amortized cost	Fair value
Due before one year	\$ 2,367	\$ 2,360	\$ -	\$ -
Due after one year through five years	54,439	54,034	-	-
Due after five years through ten years	277,018	267,347	-	-
Due after ten years	969,226	950,676	84,433	83,751
	<u>\$ 1,303,050</u>	<u>\$ 1,274,417</u>	<u>\$ 84,433</u>	<u>\$ 83,751</u>

At September 30, 2018 and December 31, 2017, investment securities with a fair value of approximately \$722,000 and \$310.9 million, respectively, were pledged to secure a line of credit with the Federal Home Loan Bank. At September 30, 2018 and December 31, 2017, investment securities with a fair value of approximately \$170.3 million and \$225.6 million, respectively, were pledged to secure a line of credit with the Federal Reserve Bank. The Bank also pledged the majority of its loans to the Federal Reserve Bank for that line of credit which it has never used. The amount of loans pledged varies and since the Bank does not utilize this line the collateral may be unpledged at any time. The line is maintained consistent with the Bank's liquidity policy which maximizes potential liquidity.

Fair values of available-for-sale securities are based on the fair market value supplied by a third-party market data provider, while the fair values of held-to-maturity securities are based on the present value of cash flows, which discounts expected cash flows from principal and interest using yield to maturity at the measurement date, or prices provided by securities dealers with expertise in the securities being evaluated, or actual trade data from an independent pricing service.

The table below indicates the length of time individual securities had been in a continuous unrealized loss position at September 30, 2018 (dollars in thousands):

Available-for-sale	Number of securities	Less than 12 months		12 months or longer		Total

Total temporarily impaired investment securities	210	\$ 631,042	\$ (4,805)	\$ 233,559	\$ (4,654)	\$ 864,601	\$ (9,459)

Held-to-maturity Description of Securities	Number of securities	Less than 12 months		12 months or longer		Total	
		Fair Value	Unrealized losses	Fair Value	Unrealized losses	Fair Value	Unrealized losses
Corporate and other debt securities:							
Single issuers	1	\$ -	\$ -	\$ 6,600	\$ (2,516)	\$ 6,600	\$ (2,516)
Total temporarily impaired		\$ -	\$ -	\$ 6,600	\$ (2,516)	\$ 6,600	\$ (2,516)
investment securities	1	\$ -	\$ -	\$ 6,600	\$ (2,516)	\$ 6,600	\$ (2,516)

Other securities included in the held-to-maturity classification at September 30, 2018 consisted of one single-issuer trust preferred security and three securities secured by diversified portfolios of corporate securities.

A total of \$9.2 million of other debt securities - single issuers is comprised of the amortized cost of one single-issuer trust preferred security issued by an insurance company.

A total of \$75.3 million of other debt securities – pooled is comprised of three securities consisting of diversified portfolios of corporate securities.

The following table provides additional information related to the Company's single issuer trust preferred securities as of September 30, 2018 (in thousands):

Single issuer	Book value	Fair value	Unrealized gain/(loss)	Credit rating
Security A	9,155	7,388	(1,767)	Not rated

The Company has evaluated the securities in the above tables and has concluded that none of these securities has impairment that is other-than-temporary. The Company evaluates whether a credit impairment exists by considering primarily the following factors: (a) the length of time and extent to which the fair value has been less than the amortized cost of the security, (b) changes in the financial condition, credit rating and near-term prospects of the issuer, (c) whether the issuer is current on contractually obligated interest and principal payments, (d) changes in the financial condition of the security's underlying collateral and (e) the payment structure of the security. The Company's determination of the best estimate of expected future cash flows, which is used to determine the credit loss amount, is a quantitative and qualitative process that incorporates information received from third-party sources along with internal assumptions and judgments regarding the future performance of the security. The Company concluded that most of the securities that are in an unrealized loss position are in a loss position because of changes in market interest rates after the securities were purchased. Securities that have been in an unrealized loss position for 12 months or longer include other securities whose market values are sensitive to market interest rates. The Company's unrealized loss for other debt securities, which include one single issuer trust preferred securities, is primarily related to general market conditions, including a lack of liquidity in the market. The severity of the temporary impairments in relation to the carrying amounts of the individual investments is consistent with market developments. The Company's analysis of each investment is performed at the security level. As a result of its review, the Company concluded that other-than-temporary impairment did not exist due to the Company's ability and intention to hold these securities to recover their amortized cost basis.

Note 6. Loans

The Company has several lending lines of business including SBA loans, direct lease financing, SBLOC and other specialty and consumer lending. The Company also originates loans for sale into commercial mortgage backed securitizations or to secondary government guaranteed loan markets. These sales are accounted for as true sales, and servicing rights on these loans are not retained. The Company has elected fair value treatment for these loans to better reflect the economics of the transactions. At September 30, 2018, the fair value of the loans held for sale was \$308.5 million and their book value was \$306.4 million. Included in the realized and unrealized gains (losses) on loans originated for sale in the Consolidated Statements of Operations were unrealized losses on unsold loans. For the nine months ended September 30, 2018, losses recognized for such changes in fair value were \$2.3 million. For the nine months ended September 30, 2017, gains similarly recognized were \$1.9 million. There were no changes in fair value related to credit risk. Interest earned on loans held for sale during the period held are recorded in Interest Income-Loans, including fees, in the Consolidated Statements of Operations. The Bank also pledged the majority of its loans to the Federal Reserve Bank for that line of credit which it has never used. The amount of loans pledged varies and since the Bank does not utilize this line the collateral may be unpledged at any time. The line is maintained consistent with the Bank's liquidity policy which maximizes potential liquidity.

The loans sold to the commercial mortgage backed securitizations are transitional commercial mortgage loans which are made to improve and rehabilitate existing properties which are already cash flowing. Through September 30, 2018 the Company has sponsored

the structuring of four separate commercial mortgage loan securitizations. Each of the securitizations is considered a variable interest entity of which the Company is not the primary beneficiary. Further, true sale accounting has been applicable to each of the securitizations, as supported by a review performed by an independent third-party consultant. In each of the securitizations, the Company has obtained a tranche of certificates which are accounted for as available for sale debt securities. The securities are recorded at fair value at acquisition, which is determined by an independent third party based on the discounted cash flow method using unobservable (level 3) inputs. The loans securitized are structured with some prepayment protection and with extension options which are common for rehabilitation loans. It is expected that those factors would generally offset the impact of prepayments which are accordingly not assumed. Because of credit enhancements for each security, cash flows were not reduced by expected losses. The Company does not service the loans sold into these securitizations. For each of the securitizations, the Company has recorded a gain which is comprised of (i) the excess of consideration received by the Company in the transaction over the carrying value of the loans at securitization, less related transactions costs incurred; and (ii) the recognition of previously deferred origination costs and exit costs.

A summary of securitizations and securities obtained from those securitizations is as follows:

- In the third quarter of 2018, the Company sponsored The Bancorp Commercial Mortgage 2018-CRE4 Trust, securitizing \$341.0 million of loans and recording a \$9.0 million gain. The certificates obtained by the Company in the transaction had an acquisition date fair value of \$33.7 million based upon an initial discount rate of 4.88%.
- In the first quarter of 2018, the Company sponsored The Bancorp Commercial Mortgage 2018-CRE3 Trust, securitizing \$304.3 million of loans and recording an \$11.7 million gain. The certificates obtained by the Company in the transaction had an acquisition date fair value of \$28.4 based upon an initial discount rate of 5.79%.
- In the third quarter of 2017, the Company sponsored The Bancorp Commercial Mortgage 2018-CRE2 Trust, securitizing \$314.4 million of loans and recording a \$12.0 million gain. The certificates obtained by the Company had an acquisition date fair value of \$24.6 million based upon an initial discount rate of 9.41%.
- In the first quarter of 2017, the Company sponsored The Bancorp Commercial Mortgage 2018-CRE1 Trust, securitizing \$263.1 million of loans and recording a \$5.1 million gain. The certificates obtained by the Company in the transaction had an acquisition date fair value of \$21.7 million based upon an initial discount rate of 4.78%.

The Company analyzes credit risk prior to making loans on an individual loan basis. The Company considers relevant aspects of the borrowers' financial position and cash flow, past borrower performance, management's knowledge of market conditions, collateral and the ratio of loan amounts to estimated collateral value in making its credit determinations.

Major classifications of loans, excluding loans held for sale, are as follows (in thousands):

	September 30, 2018	December 31, 2017
SBA non-real estate	\$ 74,408	\$ 70,379
SBA commercial mortgage	166,432	142,086
SBA construction	17,978	16,740
SBA loans *	258,818	229,205
Direct lease financing	395,976	377,660
SBLOC	778,552	730,462
Other specialty lending	40,799	30,720
Other consumer loans	12,172	14,133
	1,486,317	1,382,180
Unamortized loan fees and costs	10,456	10,048
Total loans, net of deferred loan fees and costs	\$ 1,496,773	\$ 1,392,228

Included in the table above under other consumer loans are demand deposit overdrafts reclassified as loan balances totaling \$2.6 million and \$2.3 million at September 30, 2018 and December 31, 2017, respectively. Overdraft charge-offs and recoveries are reflected in the allowance for loan and lease losses.

* The following table shows SBA loans and SBA loans held for sale at the dates indicated (in thousands):

	September 30, 2018	December 31, 2017

Note 7. Transactions with Affiliates

The Bank maintains deposits for various affiliated companies totaling approximately \$797,000 and \$4.7 million as of September 30, 2018 and December 31, 2017, respectively.

The Bank has entered into lending transactions in the ordinary course of business with directors, executive officers, principal stockholders and affiliates of such persons. All loans were made on substantially the same terms, including interest rate and collateral, as those prevailing at the time for comparable loans with persons not related to the lender. At September 30, 2018, these loans were current as to principal and interest payments and did not involve more than normal risk of collectability. Loans to these related parties amounted to \$1.8 million at September 30, 2018 and \$1.7 million at December 31, 2017.

The Bank periodically purchases securities under agreements to resell and engages in other securities transactions through J.V.B. Financial Group, LLC, (JVB), a broker dealer in which the Company's Chairman is Chairman and has a minority interest. The Company's Chairman also serves as President of Cohen & Company Financial Limited (formerly Euro Dekania Management Ltd.), a wholly-owned subsidiary of Cohen & Company Inc. (formerly Institutional Financial Markets Inc.), the parent company of JVB. In 2018, the Company purchased \$6.7 million of government guaranteed SBA loans for Community Reinvestment Act purposes from JVB. Prices for these loans are verified to market rates and no separate commissions or fees are paid to that firm. The Company purchased securities under agreements to resell through JVB primarily consisting of Government National Mortgage Association certificates which are full faith and credit obligations of the United States government issued at competitive rates. JVB was in compliance with all of the terms of the agreements at September 30, 2018 and had complied with all terms for all prior repurchase agreements. There were \$64.5 million and \$64.3 million of repurchase agreements outstanding at September 30, 2018 and December 31, 2017, respectively.

Mr. Hersh Kozlov, a director of the Company, is a partner at Duane Morris LLP, an international law firm. The Company paid Duane Morris LLP \$2.2 million and \$2.5 million for legal services for the nine months ended September 30, 2018 and September 30, 2017, respectively.

Note 8. Fair Value Measurements

ASC 825, “Financial Instruments”, requires disclosure of the estimated fair value of an entity’s assets and liabilities considered to be financial instruments. For the Company, as for most financial institutions, the majority of its assets and liabilities are considered to be financial instruments. However, many such instruments lack an available trading market as characterized by a willing buyer and willing seller engaging in an exchange transaction. Accordingly, estimated fair values are determined by the Company using the best available data and an estimation methodology it believes to be suitable for each category of financial instruments. Also, it is the Company’s general practice and intent to hold its financial instruments to maturity whether or not categorized as “available-for-sale” and not to engage in trading or sales activities, except for the sale of commercial loans to secondary markets. For fair value disclosure purposes, the Company utilized certain value measurement criteria required under ASC 820, “Fair Value Measurements and Disclosures”, as discussed below. During the nine months ended September 30, 2018, there were no transfers between the three levels which categorize assets and liabilities by the type of information available for valuation purposes.

Changes in the assumptions or methodologies used to estimate fair values may materially affect the estimated amounts. Also, there may not be reasonable comparability between institutions due to the wide range of permitted assumptions and methodologies in the absence of active markets. This lack of uniformity gives rise to a high degree of subjectivity in estimating financial instrument fair values.

Cash and cash equivalents, which are comprised of cash and due from banks, the Company’s balance at the Federal Reserve Bank and securities purchased under agreements to resell, had recorded values of \$777.6 million and \$908.9 million as of September 30, 2018 and December 31, 2017, respectively, which approximated fair values.

The estimated fair values of investment securities are based on quoted market prices, if available, or estimated using a methodology based on management’s inputs. The fair values of the Company’s investment securities held-to-maturity and loans held for sale are based on using “unobservable inputs” that are the best information available in the circumstances. Level 3 investment security fair values are based on the present value of cash flows, which discounts expected cash flows from principal and interest using yield to maturity at the measurement date.

FHLB and Atlantic Central Bankers Bank stock is held as required by those respective institutions and is carried at cost. Federal law requires a member institution of the FHLB to hold stock according to predetermined formulas. Atlantic Central Bankers Bank requires its correspondent banking institutions to hold stock as a condition of membership.

Commercial loans held for sale have estimated fair values based upon either market indications of the sales price of such loans from recent sales transactions or discounted cash flow analysis on an individual loan basis.

The net loan portfolio is valued using the present value of discounted cash flow where market prices were not available. The discount rate used in these calculations is the estimated current market rate adjusted for credit risk. Accrued interest receivable has a carrying value that approximates fair value.

On December 30, 2014, the Bank entered into an agreement for, and closed on, the sale of a portion of its discontinued commercial loan portfolio. The purchaser of the loan portfolio was a newly formed entity, 2014-1 LLC (Walnut Street). The price paid to the Bank for the loan portfolio which had a face value of approximately \$267.6 million, was approximately \$209.6 million, of which approximately \$193.6 million was in the form of two notes issued by Walnut Street to the Bank; a senior note in the principal amount of approximately \$178.2 million bearing interest at 1.5% per year and maturing in December 2024 and a subordinate note in the principal amount of approximately \$15.4 million, bearing interest at 10.0% per year and maturing in December 2024. The balance of these notes comprises the balance of the investment in unconsolidated entity on the consolidated balance sheets. The fair value was initially established by the sales price and the investment is marked quarterly to fair value, as determined using a discounted cash flow analysis. The change in value of investment in unconsolidated entity in the consolidated statements of operations reflect changes in estimated fair value. Interest paid to the bank on the note is credited to principal.

Discontinued assets held for sale are recorded at the lower of cost basis or market value. For loans, market value was determined using the discounted cash flow approach which converts expected cash flows from the loan portfolio by unit of measurement to a present value estimate. Unit of measurement was determined by loan type and for significant loans on an individual loan basis. The fair values of the Company’s loans classified as assets held for sale are based on “unobservable inputs” that are based on available information. Level 3 fair values are based on the present value of cash flows by unit of measurement. For commercial loans other than SBA loans, a market adjusted rate to discount expected cash flows from outstanding principal and interest to expected maturity at the measurement date was utilized. For SBA loans, market indications for similar loans were utilized. For other real estate owned, market value was based upon appraisals of the underlying collateral by third party appraisers, reduced by 7% to 10% for estimated selling costs.

The estimated fair values of demand deposits (comprised of interest and non-interest bearing checking accounts, savings accounts, and certain types of money market accounts) are equal to the amount payable on demand at the reporting date (generally, their carrying

amounts). The fair values of securities sold under agreements to repurchase and short term borrowings are equal to their carrying amounts as they are short-term borrowings.

Time deposits, when outstanding, and subordinated debentures have a fair value estimated using a discounted cash flow calculation that applies current interest rates to discount expected cash flows. The carrying amount of accrued interest payable approximates its fair value. Long term borrowings resulted from sold loans which did not qualify for true sale accounting. They are presented in the amount of the principal of such loans.

The fair values of interest rate swaps, recorded as part of Other Assets, are determined using models that use readily observable market inputs and a market standard methodology applied to the contractual terms of the derivatives, including the period to maturity and interest rate indices.

The fair value of commitments to extend credit is estimated based on the amount of unamortized deferred loan commitment fees. The fair value of letters of credit is based on the amount of unearned fees plus the estimated cost to terminate the letters of credit. Fair values of unrecognized financial instruments, including commitments to extend credit, and the fair value of letters of credit are considered immaterial.

The following tables provide information regarding carrying amounts and estimated fair values (in thousands) as of the dates indicated:

	September 30, 2018

In addition, ASC 820 establishes a common definition for fair value to be applied to assets and liabilities. It clarifies that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It also establishes a framework for measuring fair value and expands disclosures concerning fair value measurements. ASC 820 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Level 1 valuation is based on quoted market prices for identical assets or liabilities to which the Company has access at the measurement date. Level 2 valuation is based on other observable inputs for the asset or liability, either directly or indirectly. This includes quoted prices for similar assets in active or inactive markets, inputs other than quoted prices that are observable for the asset or liability such as yield curves, volatilities, prepayment speeds, credit risks, default rates, or inputs that are derived principally from, or corroborated through, observable market data by market-corroborated reports. Level 3 valuation is based on “unobservable inputs” which the Company believes is the best information available in the circumstances. A financial instrument’s level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The changes in the Company’s Level 3 assets measured at fair value on a recurring basis, segregated by fair value hierarchy level, year to date, are summarized below (in thousands):

Fair Value Measurements Using
Significant Unobservable Inputs

<u>Level 3 instruments only</u>	Fair value at September 30, 2018	Fair value at December 31, 2017	Valuation techniques	Unobservable inputs	Range at September 30, 2018	Range at December 31, 2017
Investment securities, available-for-sale	\$ 52,046	\$ 40,644	Discounted cash flow	Discount rate	4.88% - 6.31%	7.0% - 9.5%
Investment securities, held-to-maturity	7,388	6,600	Discounted cash flow	Discount rate	8.22%	8.00%
Federal Home Loan Bank and Atlantic Central Bankers Bank stock	1,113	991	Cost	N/A	N/A	N/A
Loans, net of deferred loan fees and costs	1,494,821	1,391,701	Discounted cash flow	Discount rate	4.21% - 7.43%	3.5% - 7.2%
Commercial - SBA	193,372	165,176	Traders' pricing	Offered quotes	100 - 115.125	100 - 117.25
Commercial - fixed	94,351	118,608	Discounted cash flow	Discount rate	5.54% - 7.29%	4.85% - 7.05%
Commercial - floating	20,747	219,532	Discounted cash flow	Discount rate	6.15% - 7.44%	5.53% - 6.04%
Commercial loans held for sale	308,470	503,316				
Investment in unconsolidated entity	64,212	74,473	Discounted cash flow	Discount rate	5.46%	4.75%
				Default rate	1.00%	1.00%
Assets held for sale from discontinued operations	226,026	304,313	Discounted cash flow	Discount rate, Credit analysis	5.00% - 10.39%	3.89% - 9.59%
Subordinated debentures	10,091	9,173	Discounted cash flow	Discount rate	8.22%	7.00%

Fair values in the above table which are estimated by the discounted cash flow method, or using other valuation techniques, are subject to uncertainty resulting from the discount rate used, or other assumptions as of the reporting date. The discount rates used are based on market comparables which vary with credit spreads and interest rate movements or expected interest rate movements. Changes in these factors could have a significant impact on estimated fair values.

Assets measured at fair value on a nonrecurring basis, segregated by fair value hierarchy, during the periods shown are summarized below (in thousands):

<u>Description</u>	<u>Fair Value Measurements at Reporting Date Using</u>			
	Fair value	Quoted prices in active markets for identical assets	Significant other observable inputs	Significant unobservable inputs
	September 30, 2018	(Level 1)	(Level 2)	(Level 3)
Impaired loans - collateral dependent (!)	\$ 4,063	-\$	-	\$ 4,063
Other real estate owned	405	-	-	405
Intangible assets	4,229	-	-	4,229
	\$ 8,697	-\$	-	\$ 8,697

<u>Description</u>	<u>Fair Value Measurements at Reporting Date Using</u>			
	Fair value	Quoted prices in active markets for identical assets	Significant other observable inputs	Significant unobservable inputs
	December 31, 2017	(Level 1)	(Level 2)	(Level 3)
Impaired loans - collateral dependent (!)	\$ 3,559	-\$	-	\$ 3,559
Other real estate owned	450	-	-	450
Intangible assets	5,377	-	-	5,377
	\$ 9,386	-\$	-	\$ 9,386

- (1) The method of valuation approach for the impaired loans was the market value approach based upon appraisals of the underlying collateral by external appraisers, reduced by 7% to 10% for estimated selling costs. Intangible assets are valued based upon internal analyses.

At September 30, 2018, principal on impaired loans and troubled debt restructurings which is accounted for on the basis of the value of underlying collateral is shown at estimated fair value of \$4.1 million. To arrive at that fair value, related loan principal of \$6.2 million was reduced by specific reserves of \$2.1 million within the allowance for loan losses as of that date, representing the deficiency between principal and estimated collateral values, which were reduced by costs to sell. When the deficiency is deemed uncollectible, it is charged off by reducing the specific reserve and decreasing principal. Included in the impaired balance at September 30, 2018 were ten troubled debt restructured loans with a balance of \$2.4 million which had specific reserves of \$771,000. Valuation techniques consistent with the market and/or cost approach were used to measure fair value and primarily included observable inputs for the individual impaired loans being evaluated such as recent sales of similar assets or observable market data for operational or carrying costs. In cases where such inputs were unobservable, the loan balance is reflected within the Level 3 hierarchy. The fair value of other real estate owned is based on an appraisal of the property using the market approach for valuation.

Note 9. Derivatives

The Company utilizes derivative instruments to assist in the management of interest rate sensitivity by modifying the repricing, maturity and option characteristics on commercial real estate loans held for sale. These instruments are not accounted for as effective hedges. As of September 30, 2018, the Company had entered into eight interest rate swap agreements with an aggregate notional amount of \$42.8 million. These swap agreements provide for the Company to receive an adjustable rate of interest based upon the three-month London Interbank Offering Rate (LIBOR). The Company recorded a gain of \$1.8 million for the nine months ended September 30, 2018 to recognize the fair value of the derivative instruments which is reported in gain (loss) on sale of loans on the Consolidated Statements of Operations. The amount receivable by the Company under these swap agreements was \$2.8 million at September 30, 2018 which is reported in other assets. The Company had minimum collateral posting thresholds with certain of its derivative counterparties and had posted cash collateral of \$251,000 as of September 30, 2018.

The maturity dates, notional amounts, interest rates paid and received and fair value of the Company's remaining interest rate swap agreements as of September 30, 2018 are summarized below (dollars in thousands):

September 30, 2018				
Maturity date	Notional amount	Interest rate paid	Interest rate received	Fair value
August 4, 2021	\$ 10,300	1.12%	2.34%	\$ 535
August 17, 2025	2,500	2.27%	2.31%	125
August 17, 2025	2,500	2.27%	2.31%	125
December 23, 2025	6,800	2.16%	2.37%	408
December 24, 2025	8,200	2.17%	2.37%	483
January 28, 2026	3,000	1.87%	2.34%	239
July 20, 2026	6,300	1.44%	2.35%	722
December 12, 2026	3,200	2.26%	2.33%	193
Total	\$ 42,800			\$ 2,830

Note 10. Other Identifiable Intangible Assets

On November 29, 2012, the Company acquired certain software rights for approximately \$1.8 million for use in managing prepaid cards in connection with an acquisition. The software is being amortized over eight years. Amortization expense is \$217,000 per year (\$396,000 over the remainder of the amortization period). The gross carrying amount of the software is \$1.8 million, and as of September 30, 2018, the accumulated amortization was \$1.4 million.

The Company accounts for its prepaid card customer list in accordance with ASC 350, "Intangibles-Goodwill and Other". The acquisition of the Stored Value Solutions division of Marshall Bank First in 2007 resulted in a customer list intangible of \$12.0 million which is being amortized over a 12 year period. Amortization expense is \$1.0 million per year (\$1.3 million over the remainder of the amortization period). The gross carrying amount of the customer list intangible is \$12.0 million, and as of September 30, 2018, the accumulated amortization was \$10.7 million.

In May 2016, the Company purchased approximately \$60 million of lease receivables which resulted in a customer list intangible of \$3.4 million that is being amortized over a 10 year period. Amortization expense is \$340,000 per year (\$1.7 million over the next five

years). The gross carrying amount of the customer list intangible is \$3.4 million, and as of September 30, 2018, the accumulated amortization was \$823,000.

Note 11. Recent Accounting Pronouncements

In May 2014, the FASB issued Accounting Standards Update (ASU) 2014-09, "Revenue from Contracts with Customers". This ASU establishes a comprehensive revenue recognition standard for virtually all industries utilizing U.S. GAAP, including those that previously followed industry-specific guidance such as the real estate and construction industries. The revenue standard's core principle is built on the contract between a vendor and a customer for the provision of goods and services. It attempts to depict the exchange of rights and obligations between the parties in the pattern of revenue recognition based on the consideration to which the vendor is entitled. To accomplish this, the standard requires five basic steps: (i) identify the contract with the customer; (ii) identify the performance obligations in the contract; (iii) identify the transaction price; (iv) allocate the transaction price to the performance obligations in the contract; and (v) recognize revenue when (or as) the entity satisfies the performance obligation. Three basic transition methods are available: full retrospective, retrospective with certain practical expedients, and a cumulative effect approach. Under the cumulative effect alternative, an entity would apply the new revenue standard only to contracts that are incomplete under legacy U.S. GAAP at the date of initial application and recognize the cumulative effect of the new standard as an adjustment to the opening balance of retained earnings. The guidance in this ASU was effective for annual periods and interim reporting periods within those annual periods, beginning after December 15, 2017. Our payments business contracts encompass our services which are performed, and earned on a daily or monthly basis; accordingly, these contracts with various third parties generally do not entail significant amounts of deferred revenues. These services consist of reconciliation, fraud detection, regulatory compliance and other services which are performed and earned daily or monthly, and are also billed and collected on a monthly basis. Accordingly, there is no significant component of the services we perform or related revenues which are deferred. We have nonetheless reviewed a significant number of such contracts for prepaid card accounts, merchant acquiring (processing card payments for merchants) and automated clearing house, or ACH, for any potentially significant ramifications of the guidance. We also reviewed other non-interest income producing categories of the Company which include service fees on deposit accounts, gains and losses on other real estate owned, gains and losses on the sale of loans and others. Additionally, the standard does not apply to revenue from loans, securities and other financial instruments. Based upon the nature of our businesses and the reviews we have performed to ascertain potential applicability, the adoption of this standard in the first quarter of 2018 did not have a significant impact on our consolidated results of operations or our consolidated financial position.

In January 2016, the FASB issued Subtopic 825-10, "Financial Instruments-Overall" Recognition and Measurement of Financial Assets and Financial Liabilities". The main provisions of the guidance include, (i) the measurement of most equity investments at fair value with changes in fair value recorded through net income, except those accounted for under the equity method of accounting, or those that do not have a readily determinable fair value (for which a practical expedient can be elected); (ii) the required use of the exit price notion when valuing financial instruments for disclosure purposes; (iii) the separate presentation in other comprehensive income of the instrument-specific credit risk portion of the total change in the fair value of a liability under the fair value option; (iv) the determination of the need for a valuation allowance on a deferred tax asset related to available for sale securities must be made in combination with other deferred tax assets. The guidance eliminates the current classifications of equity securities as trading or available for sale securities and will require separate presentation of financial assets and liabilities by category and form of the financial assets on the face of the balance sheet or within the accompanying notes. The guidance also eliminates the requirement to disclose the methods and significant assumptions used to estimate fair value of financial instruments measured at amortized cost on the balance sheet. The Company adopted this guidance in the first quarter of 2018. The adoption did not have a material impact on our consolidated financial statements.

In February 2016, the FASB issued ASU 2016-02, "Leases". The FASB issued this ASU to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet by lessees for those leases classified as operating leases under current U.S. GAAP and disclosing key information about leasing arrangements. The amendments in this ASU are effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2018. Early application of this ASU is permitted for all entities. The Company is currently assessing the impact that the adoption of this standard will have on the financial condition and results of operations of the Company.

In March 2016, the FASB issued an update ASU 2016-09, "Compensation-Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting". The Update simplifies several areas of accounting for share-based payment awards issued to employees. There are income tax effects resulting from changes in stock price from the grant date to the vesting date of the employee stock compensation. The Update will require these income tax effects to be recognized in the statement of income within income tax expense instead of within additional paid-in capital. In addition, the Update requires changes to the Statement of Cash Flows including the classification between the operating and financing section for tax activity related to employee stock compensation. The Company adopted the guidance in the first quarter of 2017, and the adoption has not had a material impact on its consolidated financial statements.

In June 2016, the FASB issued an update ASU 2016-13 – "Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments". The Update changes the accounting for credit losses on loans and debt securities. For loans and held-to-maturity debt securities, the Update requires a current expected credit loss (CECL) approach to determine the allowance for credit

losses. CECL requires loss estimates for the remaining estimated life of the financial asset using historical experience, current conditions, and reasonable and supportable forecasts. Also, the Update eliminates the existing guidance for purchased credit impaired loans, but requires an allowance for purchased financial assets with more than insignificant deterioration since origination. In addition, the Update modifies the OTTI impairment model for available-for-sale debt securities to require an allowance for credit impairment instead of a direct write-down, which allows for reversal of credit impairments in future periods based on improvements in credit. The guidance is effective in the first quarter of 2020 with a cumulative-effect adjustment to retained earnings as of the beginning of the year of adoption. While early adoption is permitted beginning in the first quarter of 2019, the Company does not expect to elect that option. The Company is evaluating the impact of the Update on the consolidated financial statements. The Company expects the Update will result in an increase in the allowance for credit losses given the change to estimated losses over the contractual life adjusted for expected prepayments, as well as the addition of an allowance for debt securities. The amount of the increase will be impacted by the portfolio composition and credit quality at the adoption date as well as economic conditions and forecasts at that time.

On December 22, 2017, the SEC staff issued Staff Accounting Bulletin No. 118 (SAB 118) to address the application of U.S. GAAP in situations when a registrant does not have the necessary information available, prepared, or analyzed (including computations) in reasonable detail to complete the accounting for certain income tax effects of the Tax Cuts and Jobs Act (the “2017 Act”). This guidance provided registrants with three scenarios: 1) Measurement of certain income tax effects is complete, 2) Measurement of certain income tax effects can be reasonably estimated, and 3) Measurement of certain income tax effects cannot be reasonably estimated. The Company has acted in good faith to estimate the effects of the 2017 Act. The results have been recognized and were reflected in the tax accounts in the 2017 year end financial statements.

In February 2018, the FASB issued ASU 2018-02, “Income Statement – Reporting Comprehensive Income (Topic 220); Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income”. ASU 2018-02 allows a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the 2017 Act. Consequently, the amendment eliminates the stranded tax effect resulting from the 2017 Act and will improve the usefulness of information reported to financial statement users. ASU 2018-02 is effective for financial statements issued for annual periods beginning after December 15, 2018. The Company early adopted ASU 2018-02. The effect of this adoption was a reclassification of \$812,000 from accumulated other comprehensive income to retained earnings on the Company’s December 31, 2017 consolidated financial statements.

In August 2018, the FASB issued ASU 2018-13, “Fair Value Measurement (Topic 820) Disclosure Framework—Changes to the Disclosure Requirements for Fair Value Measurement” which eliminates certain fair value disclosures, adds new disclosures and amends another disclosure applicable to the Company as follows. The amendment states that disclosure of measurement uncertainty of the fair values to changes in inputs will be required for the reporting date and not future dates. New fair value disclosures consist of disclosure of: a) total gains and losses in OCI from fair value changes in Level 3 assets and liabilities that are held on the balance sheet date; b) the range and weighted average of inputs and how the weighted average was calculated and c) if weighted average is not meaningful, other quantitative information that better reflects the distribution of inputs. ASU 2018-13 is effective for annual periods beginning after December 15, 2019.

Note 12. Regulatory Matters

It is the policy of the Federal Reserve that financial holding companies should pay cash dividends on common stock only out of income available over the past year and only if prospective earnings retention is consistent with the organization’s expected future needs and financial condition. The policy provides that a financial holding company should not maintain a level of cash dividends that undermines the financial holding company’s ability to serve as a source of strength to its banking subsidiaries.

Various federal and state statutory provisions limit the amount of dividends that subsidiary banks can pay to their holding companies without regulatory approval. Under Delaware banking law, the Bank’s directors may declare dividends on common or preferred stock of so much of its net profits as they judge expedient, but the Bank must, before the declaration of a dividend on common stock from net profits, carry 50% of its net profits from the preceding period for which the dividend is paid to its surplus fund until its surplus fund amounts to 50% of its capital stock and thereafter must carry 25% of its net profits for the preceding period for which the dividend is paid to its surplus fund until its surplus fund amounts to 100% of its capital stock.

In addition to these explicit limitations, federal and state regulatory agencies are authorized to prohibit a banking subsidiary or financial holding company from engaging in an unsafe or unsound practice. Depending upon the circumstances, the agencies could take the position that paying a dividend would constitute an unsafe or unsound banking practice. In August 2015, the Bank entered into an Amendment to a 2014 Consent Order with the FDIC pursuant to which the Bank may not pay dividends without prior FDIC approval. On May 11, 2015, the Company received a Supervisory Letter pursuant to which the Company may not pay dividends without prior Federal Reserve approval. The Federal Reserve approved the payment of the interest on the Company’s trust preferred securities which were due September 15, 2018. Future payments are subject to future approval by the Federal Reserve.

The Company and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possible additional discretionary actions by regulators that, if

undertaken, could have a direct material effect on the Company's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The capital amounts and classification of the Company and the Bank are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Note 13. Legal

The Company received a subpoena from the SEC, dated March 22, 2016, relating to an investigation by the SEC of the Company's restatement of its financial statements for the years ended December 31, 2010 through December 31, 2013 and the interim periods ended March 31, 2014, September 30, 2014 and September 30, 2014, which restatement was filed with the SEC on September 28, 2015, and the facts and circumstances underlying the restatement. The Company is cooperating fully with the SEC's investigation. The costs to respond to the subpoena and cooperate with the SEC's investigation have been material, and we expect such costs to continue to be material at least through the completion of the SEC's investigation.

On July 16, 2018, certain investors in a hotel project of one of the Bank's former borrowers, 550 Seabreeze Development LLC ("Seabreeze Development"), filed an adversary action against the Bank and others in the United States Bankruptcy Court of the Southern District of Florida. The note for the related loan was sold in the second quarter of 2018 and the loan is no longer on the Bank's books. The adversary action was filed within the context of a Chapter 11 bankruptcy proceeding in which Seabreeze Development is the debtor, and alleged that the Bank and others defrauded the plaintiffs into investing a total of \$10.5 million in the project. Three causes of actions were asserted against the Bank: (i) fraud in the inducement; (ii) civil conspiracy; and (iii) aiding and abetting fraud. The Bank believed the claims were without merit and vigorously defended against them. On November 1, 2018, the bankruptcy court entered an order dismissing the claims against the Bank for lack of jurisdiction. The order further stated that the dismissal was without prejudice, and that the plaintiffs may file their causes of action in an appropriate forum.

In addition, we are a party to various routine legal proceedings arising out of the ordinary course of our business. The Company believes that none of these actions, individually or in the aggregate, will have a material adverse effect on our financial condition or operations.

Note 14. Segment Financials

The Company performed a strategic evaluation of its businesses in the third quarter of 2014. As a result of the evaluation, the Company decided to discontinue its commercial lending operations, as described in Note 15, Discontinued Operations. The shift from a traditional bank balance sheet led the Company to evaluate its continuing operations. Based on the continuing operations of the Company, it was determined that there would be four segments of the business: specialty finance, payments, corporate and discontinued operations. Specialty finance includes commercial loan sales, SBA loans, leasing and SBLOCs and any deposits generated by those business lines. Payments and deposits generated by those business lines include prepaid cards, merchant payments and affinity accounts. Corporate includes the investment portfolio, corporate overhead and other non-allocated expenses. Investment income is allocated to the payments segment. These operating segments reflect the way the Company views its current operations.

The following tables provide segment information for the periods indicated:

	For the three months ended September 30, 2018				
	Specialty finance	Payments	Corporate	Discontinued operations	Total
	(in thousands)				
Interest income	\$ 24,957	\$ -	\$ 13,699	\$ -	\$ 38,656

Note 15. Discontinued Operations

The Company performed a strategic evaluation of its businesses in the third quarter of 2014 and decided to discontinue its commercial lending operations to focus on its specialty finance lending. The loans which constitute the commercial loan portfolio are in the process of disposition. As such, financial results of the commercial lending operations are presented as separate from continuing operations on the Consolidated Statements of Operations and assets of the commercial lending operations to be disposed are presented as assets held for sale on the Consolidated Balance Sheets.

The following table presents financial results of the commercial lending business included in net income (loss) from discontinued operations for the three months and nine months ended September 30, 2018 and 2017 (in thousands).

	For the three months ended September 30,		For the nine months ended September 30,	
	2018	2017	2018	2017
Interest income	\$ 2,295	\$ 3,098	\$ 6,888	\$ 9,594
Interest expense	-	-	-	-
Net interest income	2,295	3,098	6,888	9,594
Non interest income	14	549	883	1,001
Non interest expense	2,679	2,818	8,035	5,107
Income (loss) before taxes	(370)	829	(264)	5,488
Income tax (benefit) expense	(346)	318	(345)	2,050
Net income (loss)	<u>\$ (24)</u>	<u>\$ 511</u>	<u>\$ 81</u>	<u>\$ 3,438</u>

	September 30, 2018	December 31, 2017
Loans, net	\$ 197,353	\$ 270,050
Other real estate owned	28,673	34,262
Total assets	<u>\$ 226,026</u>	<u>\$ 304,313</u>

Non-interest expense included fair value adjustments of \$427,000 and \$1.4 million, respectively, for the three and nine months ended September 30, 2018 and \$1.8 million for both the three and nine months ended September 30, 2017. Discontinued operations loans are recorded at the lower of their cost or fair value. Fair value is determined using a discontinued cash flow analysis where projections of cash flows are developed in consideration of internal loan review analysis and default/prepayment assumptions for smaller pools of loans. The results of discontinued operations do not include any future severance payments. Of the approximately \$1.1 billion in book value of loans in that portfolio as of the September 30, 2014 date of discontinuance of operations, \$226.0 million of loans and other real estate owned remain in assets held for sale on the September 30, 2018 consolidated balance sheet as a result of loan sales, principal paydowns and fair value charges as of September 30, 2018. The Company is attempting to sell those remaining loans and other real estate owned.

Additionally, the Consolidated Balance Sheet reflects \$64.2 million in investment in unconsolidated entity, which is comprised of notes owned by the Company as a result of the sale of certain discontinued loans to Walnut Street, see Note 8, Fair Value Measurements. The investment in Walnut Street is classified as continuing operations in the accompanying consolidated financial statements.

Note 16. Subsequent Events

The Company evaluated its September 30, 2018 consolidated financial statements for subsequent events through the date the consolidated financial statements were issued. The Company is not aware of any subsequent events which would require recognition or disclosure in the financial statements, not otherwise disclosed herein.

Part I - Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

When used in this Form 10-Q, the words "believes", "anticipates", "expects" and similar expressions are intended to identify forward-looking statements. Such statements are subject to certain risks and uncertainties more particularly described in Item 1A, under the caption "Risk Factors," in our Annual Report on Form 10-K for the year ended December 31, 2017 and in other of our public filings with the Securities and Exchange Commission. These risks and uncertainties could cause actual results to differ materially from those expressed or implied in this Form 10-Q. We caution readers not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. We undertake no obligation to publicly revise or update these forward-looking statements to reflect events or circumstances after the date of this report except as required by applicable law.

In the following discussion we provide information about our results of operations, financial condition, liquidity and asset quality. We intend that this information facilitate your understanding and assessment of significant changes and trends related to our financial condition and results of operations. You should read this section in conjunction with "Management's Discussion and Analysis of Financial Condition and Results of Operations" included in our Annual Report on Form 10-K for the year ended December 31, 2017.

Recent Developments

On July 10, 2018, we executed an agreement to sell and transfer the fiduciary rights and obligations related to our Safe Harbor Individual Retirement Account (SHIRA) portfolio, totaling approximately \$400 million, to Millennium Trust Company, LLC (Buyer). In consideration for the sale and transfer, Buyer paid the Bank \$65.0 million, \$5.0 million of which will remain in escrow until October 10, 2019. The escrow was established as an adjunct to general representations and warranties. Because the \$65.0 million represented consideration for the sale and transfer of the fiduciary rights and obligations which were transferred during the quarter, the \$65.0 million was recognized as a gain on sale in the third quarter of 2018. In the short term, the Company believes that interest expense will increase and interest income on federal funds sold will decrease as a result of the transfers. For the nine months ended September 2018 and for the full year 2017, the Company reported related fees of \$3.4 million and \$5.9 million, respectively, in the Consolidated Statements of Operations under service fees on deposit accounts. As a result of the sale and other third quarter income, the leverage capital ratio exceeded 9% at September 30, 2018. The fiduciary rights and obligations related to the SHIRA portfolio were unrelated to our payments business and related accounts, which comprise the vast majority of our funding.

Overview

We are a Delaware financial holding company and our primary subsidiary, which we wholly own, is The Bancorp Bank, which we refer to as the Bank. The vast majority of our revenue and income is currently generated through the Bank. In our continuing operations, we have four primary lines of specialty lending: securities backed lines of credit, or SBLOC, vehicle fleet and other equipment leasing, Small Business Administration lending, or SBA loans, and commercial mortgage-backed loans, or CMBS, generated for sale into commercial mortgage backed securities markets primarily through securitizations. SBLOCs are loans which are generated through institutional banking affinity groups and are collateralized by marketable securities. SBLOCs are typically offered in conjunction with brokerage accounts and are offered nationally. Vehicle fleet and other equipment leases are generated in mid Atlantic, southern and other states. SBA loans and commercial loans generated for sale are made nationally.

The majority of our deposit accounts and non-interest income are generated in our payments business line which consists of consumer deposit accounts accessed by prepaid cards, or issuing, automated clearing house, or ACH accounts and the collection of payments through credit card companies on behalf of merchants. The issuing deposit accounts are comprised of debit and prepaid card accounts that are generated with the assistance of independent companies that market directly to end users for account acquisition. Our issuing deposit account types are diverse and include: consumer and business debit, general purpose reloadable prepaid, pre-tax medical spending benefit, payroll, gift, government, corporate incentive, reward, business payment accounts and others. Our ACH accounts facilitate payments such as payroll and bill payments and our acquiring accounts provide clearing and settlement services for payments made to merchants which must be settled through associations such as Visa or MasterCard. We also provide banking services to organizations with a pre-existing customer base tailored to support or complement the services provided by these organizations to their customers. These services include loan and deposit accounts for investment advisory companies through our institutional banking department. We typically provide these services under the name and through the facilities of each organization with whom we develop a relationship. We refer to this, generally, as affinity banking.

In the third quarter of 2014, we decided to discontinue our Philadelphia-based commercial lending operations. The loans which constitute that portfolio are in the process of disposition. This represents a strategic shift to a focus on our national specialty lending programs including small fleet leasing, SBLOC, CMBS origination and SBA lending. We have been and anticipate using the proceeds from disposition to acquire investment securities and to provide liquidity to fund growth in our continuing specialty lending lines. Yields we obtain from reinvestment of the proceeds will be subject to economic and other conditions at the time of reinvestment, including market interest rates, many of which will be beyond our control. We cannot predict whether income resulting from the reinvestment of

loans we hold for sale resulting from discontinued operations will match or exceed the amount from the sold loans. Of the approximate \$1.1 billion in book value of loans in that commercial and residential portfolio as of the September 30, 2014 date of discontinuance of operations, \$226.0 million of loans and other real estate owned remain in assets held for sale on the September 30, 2018 balance sheet, which reflects the impact of related sales, paydowns and fair value charges. Additionally, that balance sheet reflects \$64.2 million in investment in unconsolidated entity, Walnut Street, which is comprised of notes owned by the Company as a result of the sale of certain discontinued loans.

The results of the first nine months of 2018 compared to the first nine months of 2017 reflected higher pretax income and higher after tax income. Year to date pretax income for 2018 was \$111.0 million compared to \$30.2 million for 2017. Year to date net income for 2018 was \$81.6 million compared to \$34.1 million for 2017. Income in 2018 was higher primarily as a result of the sale of our IRA portfolio in 2018 and additionally as a result of higher net interest income, higher payments related fees and higher gains on sale of loans into securitizations. Statutory federal income tax rates decreased in 2018 to 21% from 34% in the prior year, and served to decrease income tax expense in 2018. Tax expense for the nine months ended September 30, 2017 was offset by reversals of deferred tax valuation allowances. The improvement in pretax income primarily reflected revenue growth, including a \$65.0 million gain on the aforementioned sale of the IRA portfolio. Continuing growth in net interest income, which increased \$10.2 million, reflected a \$6.1 million, or 39.4%, increase in SBLOC interest income between those respective periods. SBLOC loans comprise our largest loan portfolio and totaled \$778.6 million at September 30, 2018, reflecting an 8.1% increase over the prior year. Related interest income also reflected the impact of Federal Reserve rate increases. Over the same periods, SBA loans increased approximately 18.9% and related interest income also benefited from rate increases. Interest expense increased to a significantly lesser extent, resulting in the increase in net interest income. The Bank's largest funding source, prepaid card accounts, contractually adjust to only a portion of increases in market rates. Prepaid card fees are the largest driver of non-interest income. Year to date fees in 2018 increased 5.8% over year to date 2017 and totaled \$41.6 million. ACH, card and other payment processing fees increased 36.5% to \$6.3 million. Gain on sale of loans originated for sale increased 15.6% to \$20.3 million reflecting a higher volume of loans sold. Total revenues, consisting of net interest income and non-interest income increased \$76.0 million to \$227.3 million compared to \$151.4 million in the prior year, an increase of 50.2%. Non-interest expense decreased 4.5%, or \$5.4 million over those periods, to \$113.7 million. The holding company leverage ratio was 9.61% at September 30, 2018 compared to 7.90% at September 30, 2017.

Critical Accounting Policies and Estimates

Our accounting and reporting policies conform with accounting principles generally accepted in the United States and general practices within the financial services industry. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and the accompanying notes. Actual results could differ from those estimates. We believe that the determination of our allowance for loan and lease losses, our determination of the fair value of financial instruments and the level in which an instrument is placed within the valuation hierarchy, our determination of other than temporary impairment, and income taxes involve a higher degree of judgment and complexity than our other significant accounting policies.

We determine our allowance for loan and lease losses with the objective of maintaining a reserve level we believe to be sufficient to absorb our estimated probable credit losses. We base our determination of the adequacy of the allowance on periodic evaluations of our loan portfolio and other relevant factors. However, this evaluation is inherently subjective as it requires material estimates, including, among others, expected default probabilities, the amount of loss we may incur on a defaulted loan, expected commitment usage, the amounts and timing of expected future cash flows on impaired loans, value of collateral, estimated losses on consumer loans and residential mortgages, and general amounts for historical loss experience. We also evaluate economic conditions and uncertainties in estimating losses and inherent risks in our loan portfolio. To the extent actual outcomes differ from our estimates, we may need additional provisions for loan losses. Any such additional provisions for loan losses will be a direct charge to our earnings. See "Allowance for Loan and Lease Losses".

The fair value of a financial instrument is defined as the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. We estimate the fair value of a financial instrument using a variety of valuation methods. Where financial instruments are actively traded and have quoted market prices, quoted market prices are used for fair value. When the financial instruments are not actively traded, other observable market inputs, such as quoted prices of securities with similar characteristics, may be used, if available, to determine fair value. When observable market prices do not exist, we estimate fair value. Our valuation methods and inputs consider factors such as types of underlying assets or liabilities, rates of estimated credit losses, interest rate or discount rate and collateral. Our best estimate of fair value involves assumptions including, but not limited to, various performance indicators, such as historical and projected default and recovery rates, credit ratings, current delinquency rates, loan-to-value ratios and the possibility of obligor refinancing.

At the end of each quarter, we assess the valuation hierarchy for each asset or liability measured. From time to time, assets or liabilities may be transferred within hierarchy levels due to changes in availability of observable market inputs to measure fair value at the measurement date. Transfers into or out of hierarchy levels are based upon the fair value at the beginning of the reporting period.

We periodically review our investment portfolio to determine whether unrealized losses on securities are temporary, based on evaluations of the creditworthiness of the issuers or guarantors, and underlying collateral, as applicable. In addition, we consider the continuing performance of the securities. We recognize credit losses through the Consolidated Statements of Operations. If management believes market value losses are temporary and that we have the ability and intention to hold those securities to maturity, we recognize the reduction in other comprehensive income, through equity. We evaluate whether an other than temporary impairment exists by considering primarily the following factors: (a) the length of time and extent to which the fair value has been less than the amortized cost of the security, (b) changes in the financial condition, credit rating and near-term prospects of the issuer, (c) whether the issuer is current on contractually obligated interest and principal payments, (d) changes in the financial condition of the security's underlying collateral and (e) the payment structure of the security. If other than temporary impairment is determined, we estimate expected future cash flows to determine the credit loss amount with a quantitative and qualitative process that incorporates information received from third-party sources and internal assumptions and judgments regarding the future performance of the security.

We account for our stock-based compensation plans based on the fair value of the awards made, which include stock options, restricted stock, and performance based shares. To assess the fair value of the awards made, management makes assumptions as to expected stock price volatility, option terms, forfeiture rates and dividend rates. All of these estimates and assumptions may be susceptible to significant change that may impact earnings in future periods.

We account for income taxes under the liability method whereby we determine deferred tax assets and liabilities based on the difference between the carrying values on our consolidated financial statements and the tax basis of assets and liabilities as measured by the enacted tax rates which will be in effect when these differences reverse. Deferred tax expense (benefit) is the result of changes in deferred tax assets and liabilities.

Financial Statement Restatement

We have adjusted our financial statement presentation for items related to discontinued operations. Separately, we have restated our financial statements for periods from 2010 through September 30, 2014, the last date through which financial statements previously had been filed prior to our 2015 filing of our Annual Report on Form 10-K for the year ended December 31, 2014. The restatement reflected the recognition of provisions for loan losses and loan charge-offs for discontinued operations in periods earlier than those in which those charges were initially recognized. The majority of these loan charges were originally recognized in 2014, primarily in the third quarter, when commercial lending operations were discontinued. An additional \$28.5 million of discontinued operations losses that were not previously reported were included within these periods. Also, \$12.7 million of losses incurred in 2015 related to loans that were resolved before the issuance date of our financial statements and were reflected in our 2014 financial statements. Substantially all of the losses and corresponding restatement adjustments resulted from the discontinued commercial loan operations.

Regulatory Actions

The Bank entered into a Stipulation and Consent to the Issuance of a Consent Order with the FDIC effective August 7, 2012, which we refer to as the 2012 Consent Order. The Bank took this action without admitting or denying any charges of unsafe or unsound banking practices or violations of law or regulation. Under the 2012 Consent Order, the Bank agreed to increase its supervision of third-party relationships, develop new written compliance and related internal audit compliance programs, develop a new third-party risk management program and screen new third-party relationships as provided in the Consent Order. As part of the Consent Order, the Bank agreed to pay a civil money penalty in the amount of \$172,000, which was paid in 2012. The 2012 Consent Order was amended and restated in 2015 as noted below.

On June 5, 2014, the Bank entered into a Stipulation and Consent to the Issuance of a Consent Order with the FDIC, which we refer to as the 2014 Consent Order. The Bank took this action without admitting or denying any charges of unsafe or unsound banking practices or violations of law or regulation relating to the Bank's Bank Secrecy Act, or BSA, compliance program. The 2014 Consent Order required the Bank to take certain affirmative actions to comply with its BSA obligations. Satisfaction of the requirements of the 2014 Consent Order is subject to the review of the FDIC and the Delaware State Bank Commissioner. The Bank has and expects to continue to expend significant management and financial resources to address the Bank's BSA compliance program which will reduce our net income. Expenses associated with the required look back review were significant in 2015 and 2016. The look back review was completed in the third quarter of 2016. The 2014 Consent Order reserves the right for our federal or state banking regulators or any other federal or state agency or department to take additional action against the Bank or any of the Bank's current or former institution-affiliated parties which, based on the alleged violations, could include civil or criminal proceedings and civil money penalties.

Until the Bank submits to the FDIC a report summarizing the completion of certain BSA-related corrective action ("BSA Report"), the 2014 Consent Order restricts the Bank from signing and boarding new independent sales organizations, establishing new non-benefit reloadable prepaid card programs and originating Automated Clearing House transactions for new merchant-related payments. The BSA Report will be filed when the Bank is able to demonstrate the sustained adequacy of BSA policies and procedures, training, and internal controls related to the restricted activities, including validation of the same by the Bank's independent BSA testing function. Until the BSA Report is submitted to and approved by the FDIC and Delaware State Bank Commissioner, those aspects of the growth

of our card payment processing and prepaid card operations will be affected, which, unless offset by growth from existing customers and new customers in other areas of our prepaid card operations, could reduce growth of our deposits and non-interest income and, possibly, limit our ability to raise additional capital on acceptable terms.

On August 27, 2015, the Bank entered into an Amendment to Consent Order, or the 2014 Consent Order Amendment, with the FDIC, amending the 2014 Consent Order. The Bank took this action without admitting or denying any additional charges of unsafe or unsound banking practices or violations of law or regulation relating to continued weaknesses in the Bank's BSA compliance program. The 2014 Consent Order Amendment provides that the Bank shall not declare or pay any dividend without the prior written consent of the FDIC and for certain assurances regarding management.

On May 11, 2015, the Federal Reserve issued a letter, or the Supervisory Letter, to us as a result of the 2014 Consent Order and the 2014 Consent Order Amendment (which, at the time of the Supervisory Letter, was in proposed form), which provides that we shall not pay any dividends on our common stock or make any interest payments on our trust preferred securities, without the prior written approval of the Federal Reserve. It further provides that we may not incur any debt (excluding payables in the ordinary course of business) or redeem any shares of our stock, without the prior written approval of the Federal Reserve.

On December 23, 2015, the Bank entered into a Stipulation and Consent to the Issuance of an Amended Consent Order, Order for Restitution, and Order to Pay Civil Money Penalty with the FDIC, which we refer to as the 2015 Consent Order. The Bank took this action without admitting or denying any charges of violations of law or regulation. The 2015 Consent Order amended and restated in its entirety the terms of the 2012 Consent Order. The 2015 Consent Order was based on FDIC allegations regarding electronic fund transfer, or EFT, error resolution practices, account termination practices and fee practices of various third parties with whom the Bank had previously provided, or currently provides, deposit-related products, whom we refer to as Third Parties. The 2015 Consent Order continues the Bank's obligations originally set forth in the 2012 Consent Order, including its obligations to increase board oversight of the Bank's compliance management system, or CMS, improve the Bank's CMS, enhance its internal audit program, increase its management and oversight of Third Parties, and correct any apparent violations of law.

In addition to restating the general terms of the 2012 Consent Order, the 2015 Consent Order directs the Bank's Board of Directors to establish a Complaint and Error Claim Oversight and Review Committee, which we refer to as the Complaint and Error Claim Committee, to review and oversee the Bank's processes and practices for handling, monitoring and resolving consumer complaints and EFT error claims (whether received directly or through Third Parties) and to review management's plans for correcting any weaknesses that may be found in such processes and practices. The Bank's Board of Directors appointed the required Complaint and Error Claim Committee on January 29, 2016.

The 2015 Consent Order also requires the Bank to implement a corrective action plan, or CAP, to remediate and provide restitution to those prepaid cardholders who asserted or attempted to assert, or were discouraged from initiating EFT error claims and to provide restitution to cardholders harmed by EFT error resolution practices. The 2015 Consent Order requires that if, through the CAP, the Bank identifies prepaid cardholders who have been adversely affected by a denial or failure to resolve an EFT error claim, the Bank will ensure that monetary restitution is made. Neither we nor the Bank can predict the amount of any restitution which may be required, or the amount, if any, that the Bank may pay in connection therewith. Under the Bank's agreements with Third Parties, we believe that restitution is reimbursable to the Bank. The CAP is currently being implemented. To date, \$19,489.40 in restitution has been paid.

The 2015 Consent Order also imposed a \$3 million civil money penalty on the Bank, which the Bank has paid and which was recognized as expense in the fourth quarter of 2015.

On March 7, 2018, the Bank entered into a Stipulation and Consent to Order for Restitution and Order To Pay Civil Money Penalty with the FDIC, which we refer to as the 2018 Restitution Order and 2018 CMP Order, respectively. The Bank took this action without admitting or denying any alleged violations of law or regulation. The FDIC's action principally emanates from one of the Bank's third-party payment processors, or Third Party Processor, that suffered an internal system programming glitch. This inadvertently resulted in consumers that engaged in signature-based point of sale transactions during the period from December 2010 to November 2014 being charged a greater fee than what was disclosed by the Bank. The FDIC alleged the Bank's incorrect fee imposition due to the Third Party Processor error was an unfair or deceptive act or practice and violated Section 5 of the Federal Trade Commission Act. The 2018 Restitution Order requires the Bank to develop a written Restitution Plan, subject to independent audit and FDIC non-objection, to ensure impacted consumers are compensated for any incorrectly charged fees. The 2018 Restitution Order requires the Bank to make such reimbursements if not otherwise made by the Third Party Processor and the Bank is indemnified by the Third Party Processor for such reimbursements. Impacted consumers have been reimbursed by the Third Party Processor at its own expense. The Bank is in the process of complying with the written documentation and audit requirements of the Restitution Order. The 2018 CMP Order imposed a \$2 million civil money penalty on the Bank which the Bank has paid, and was recognized as expense on September 30, 2017. The civil money penalty is not subject to any indemnification or recovery from any third party.

Results of Operations

Third quarter 2018 to third quarter 2017

Net Income: Income from continuing operations before income taxes increased to \$83.2 million in third quarter 2018 from \$12.2 million in the third quarter of 2017. Net income from continuing operations for the third quarter of 2018 was \$61.3 million, or \$1.07 per diluted share, compared to \$6.8 million, or \$0.12 per diluted share for the third quarter of 2017. Net income from continuing operations increased between those respective periods primarily as a result of the \$65.0 million gain on sale of our IRA portfolio in the third quarter of 2018, higher net interest income and payments related fees and lower non-interest expense. The increase in net income also reflected the impact of a 21% statutory federal tax rate in 2018 compared to a 34% rate in 2017. After discontinued operations, net income for the third quarter of 2018 was \$61.3 million compared to \$7.3 million for the third quarter of 2017. Net interest income for the third quarter of 2018 compared to the third quarter of 2017 increased to \$30.6 million from \$27.9 million primarily as a result of higher loan balances and higher yields, reflecting the Federal Reserve's rate increases. The provision for loan and lease losses increased \$260,000 to \$1.1 million in the third quarter of 2018 compared to \$800,000 in the third quarter of 2017. Non-interest income (excluding security gains and losses) increased \$62.5 million primarily due to the \$65.0 million gain on sale of the IRA portfolio. Non-interest expense decreased \$6.6 million to \$37.3 million in the third quarter of 2018 compared to \$43.9 million in the third quarter 2017. Non-interest expense in 2017 reflected a \$2.5 million civil money penalty. Diluted income per share was \$1.07 in the third quarter of 2018 compared to \$0.13 diluted income per share in the third quarter of 2017 primarily reflecting the factors noted above.

Net Interest Income: Our net interest income for the third quarter of 2018 increased to \$30.6 million, an increase of \$2.7 million, or 9.8% from \$27.9 million in the third quarter of 2017. Our interest income for the third quarter of 2018 increased to \$38.7 million, an increase of \$6.7 million, or 21.1% from \$31.9 million for the third quarter of 2017. The increase in interest income resulted primarily from higher loan balances and higher yields. Our average loans and leases increased to \$2.00 billion for the third quarter of 2018 from \$1.84 billion for the third quarter of 2017, an increase of \$162.6 million, or 8.8%. Related interest income increased \$3.5 million on a tax equivalent basis. The increase in average loans reflected growth in SBLOC, SBA and leasing. Our average investment securities increased to \$1.37 billion for the third quarter of 2018 from \$1.25 billion for the third quarter of 2017, as purchases for estimated 2018 maturities were accelerated as a result of increases in market rates. Related tax equivalent interest income increased \$2.0 million on a tax equivalent basis as a result of higher balances and yields. Yields on both loans and investment securities increased as a result of the impact of the Federal Reserve's rate increases on variable rate loans and securities. While interest income increased by the aforementioned \$6.7 million, interest expense increased by \$4.0 million, as deposits also repriced to the higher rate environment. As a result of the sale of the safe harbor deposit portfolio in July 2018, we believe that in the short term, interest income on balances at the Federal Reserve Bank will decrease and interest expense on deposits will increase.

Our net interest margin (calculated by dividing net interest income by average interest earning assets) for the third quarter of 2018 was 3.22% which was comparable to the 3.26% for the third quarter of 2017. While the yield on interest earning assets in continuing operations increased 34 basis points, the cost of deposits and interest bearing liabilities increased 40 basis points. The increase in the cost of deposits and interest bearing liabilities was negatively impacted by the interest paid on safe harbor IRAs to their acquirer prior to their transfer on October 1, 2018. Compared to second quarter 2018, the third quarter 2018 margin benefited from higher balances of commercial loans available for sale, prior to their September 28, 2018 sale. In the third quarter of 2018, the average yield on our loans increased to 4.99% from 4.66% for the third quarter of 2017, an increase of 33 basis points. Yields on taxable investment securities in the third quarter of 2018 increased to 3.20% compared to 2.86% for the third quarter of 2017, an increase of 34 basis points. Average interest earning deposits at the Federal Reserve Bank increased \$79.0 million, or 21.6% to \$445.8 million in the third quarter of 2018 from \$366.7 million in the third quarter of 2017. That difference reflected a minimal percentage of total deposits, and resulted primarily from daily fluctuations in deposits and loans. The interest cost of total deposits and interest bearing liabilities increased to 0.83% for the third quarter of 2018 as compared to 0.43% in the third quarter of 2017. As a result of the sale of the safe harbor IRA deposit portfolio in July 2018, we believe that in the short term, the interest cost of deposits will increase.

Average Daily Balances. The following table presents the average daily balances of assets, liabilities and shareholders' equity and the respective interest earned or paid on interest-earning assets and interest-bearing liabilities, as well as average annualized rates, for the periods indicated:

	Three months ended September 30,					
	2018			2017

* Full taxable equivalent basis, using a statutory tax rate of 21% for 2018 and 35% for 2017, respectively.

** Includes loans held for sale.

For the third quarter of 2018, average interest earning assets increased to \$3.88 billion, an increase of \$362.7 million, or 10.3%, from \$3.52 billion in the third quarter of 2017. The increase reflected increased average balances of loans and leases of \$162.6 million, or 8.8%, increased average investment securities of \$121.8 million, or 9.8%, and increased average interest earning deposits at the Federal Reserve Bank of \$79.0 million, or 21.6%. For those respective periods, average demand and interest checking deposits increased \$194.7 million, or 6.0%. Of the \$400 million IRA portfolio which was sold in the third quarter of 2018, approximately \$262 million had not

been transferred to the acquirer as of September 30, 2018. These funds were transferred on October 1, 2018 resulting in a reduction in interest earning deposits at the Federal Reserve Bank.

Provision for Loan and Lease Losses. Our provision for loan and lease losses was \$1.1 million for the third quarter of 2018 compared to \$800,000 for the third quarter of 2017. The allowance for loan losses increased to \$8.1 million, or 0.54% of total loans at September 30, 2018, from \$7.1 million, or 0.51% of total loans at December 31, 2017. We believe that our allowance is adequate to cover expected losses. For more information about our provision and allowance for loan and lease losses and our loss experience, see “Financial Condition-Allowance for loan and lease losses”, “-Net charge-offs,” and “-Non-performing loans, loans 90 days delinquent and still accruing, and troubled debt restructurings,” below and Note 6 to the financial statements.

Non-Interest Income. Non-interest income was \$91.0 million in the third quarter of 2018 compared to \$28.5 million in the third quarter of 2017 before gains on sale of investment securities of \$15,000 in the third quarter of 2018 and \$506,000 in the third quarter of 2017. The \$62.5 million, or 219.1% increase between those respective periods, reflected the \$65.0 million gain on sale of our IRA portfolio in the third quarter of 2018. It also reflected a \$2.4 million decrease in gain on loans originated for sale to \$9.0 million for the third quarter of 2018 from \$11.4 million in the third quarter of 2017. The decrease reflected a decrease in market values for related loans. Prepaid card fees increased \$713,000 or 5.7% to \$13.2 million for the third quarter of 2018 compared to \$12.5 million in third quarter 2017. The increase reflected increased volumes of transactions. ACH, card and other payment processing fees increased \$717,000, or 45.8%, to \$2.3 million for the third quarter of 2018 compared to \$1.6 million in the third quarter of 2017. The increase resulted from an increase in transaction volume including fees earned from a new payment service which permits payment transfers in minutes, instead of days. Leasing income increased \$53,000, or 7.5%, to \$758,000 for the third quarter of 2018 from \$705,000 for the third quarter of 2017, which reflected higher gains on disposition of leased vehicles in 2018. Affinity fees decreased by \$191,000, or 69.5%, to \$84,000 for the third quarter of 2018 from \$275,000 for the third quarter of 2017. The decrease resulted from the exit of one affinity relationship whose ownership had changed. Service fees on deposit accounts decreased \$1.3 million, or 76.4%, to \$402,000 for the third quarter of 2018 from \$1.7 million for the third quarter of 2017, reflecting the impact of the sale of the IRA portfolio. In July 2018, the safe harbor IRA portfolio was sold which will result in the elimination of the vast majority of service fees on deposit accounts. Other non-interest income decreased \$71,000, or 18.9%, to \$305,000 for the third quarter of 2018 from \$376,000 in the third quarter of 2017.

Non-Interest Expense. Total non-interest expense was \$37.3 million for the third quarter of 2018, a decrease of \$6.6 million, or 15.0%, compared to \$43.9 million for the third quarter of 2017. Third quarter 2017 non-interest expense included a \$2.5 million civil money penalty. Decreases in salaries, data processing expense and legal were partially offset by increases in consulting, software, and FDIC insurance expenses. Salaries and employee benefits decreased to \$19.2 million for the third quarter of 2018, a decrease of \$2.5 million, or 11.7% from \$21.8 million for the third quarter of 2017. The decrease reflected lower incentive expenses. Depreciation and amortization decreased \$81,000, or 7.5% to \$999,000 in the third quarter of 2018 from \$1.1 million in the third quarter of 2017. The decrease reflected reduced spending on fixed assets and equipment. Rent and occupancy decreased \$25,000, or 1.8%, to \$1.3 million in the third quarter of 2018 from \$1.4 million in the third quarter of 2017. The decrease reflected a reduction in leased space and more efficient use of office space. Data processing decreased by \$546,000, or 28.3%, to \$1.4 million in the third quarter of 2018 from \$1.9 million in the third quarter of 2017. The decrease reflected the impact of a renegotiated data processing contract and lower account and transaction volume as a result of the planned exit of an affinity program which had an ownership change. Printing and supplies increased \$3,000, or 1.1%, to \$285,000 in the third quarter of 2018 from \$282,000 in the third quarter of 2017. Audit expense increased \$78,000, or 19.8%, to \$471,000 in the third quarter of 2018 from \$393,000 in the third quarter of 2017 which reflected increased regulatory and tax compliance audit fees. Legal expense decreased \$1.1 million, or 41.3%, to \$1.6 million in the third quarter of 2018 from \$2.7 million in the third quarter of 2017, reflecting decreased costs associated with an SEC subpoena related to the restatement of the financial statements (see “Financial Statement Restatement”) and other regulatory related legal fees. Amortization of intangible assets increased \$5,000, or 1.3%, to \$382,000 for the third quarter of 2018 from \$377,000 for the third quarter of 2017. FDIC insurance expense increased \$178,000, or 8.6%, to \$2.2 million for the third quarter of 2018 from \$2.1 million in the third quarter of 2017 due to a change in estimates of rates. Software expense increased \$505,000, or 16.4%, to \$3.6 million in the third quarter of 2018 from \$3.1 million in the third quarter of 2017 reflecting additional information technology infrastructure to improve efficiency and scalability, including BSA software required to satisfy regulatory requirements. Insurance expense increased \$40,000, or 6.3%, to \$673,000 in the third quarter of 2018 compared to \$633,000 in the third quarter of 2017. The increase reflected the impact of increased limits for liability coverages. Telecom and IT network communications decreased \$94,000, or 22.1%, to \$332,000 in the third quarter of 2018 from \$426,000 in the third quarter of 2017. The decrease reflected cost cutting efforts which included the elimination of corporate sponsored cell phones. Consulting increased \$625,000, or 123.8%, to \$1.1 million in the third quarter of 2018 from \$505,000 in the third quarter of 2017 reflecting increased BSA and other regulatory compliance consulting. Other non-interest expense increased \$43,000, or 1.2% to \$3.6 million in the third quarter of 2018 from \$3.6 million in the third quarter of 2017.

Income Taxes. Income tax expense for continuing operations was \$21.9 million for the third quarter of 2018 compared to \$5.5 million in the third quarter of 2017. A 26.4% effective tax rate in 2018 reflected the reduced 21% federal tax rate effective in that year, compared to the prior year federal rate of 34%. It also reflected the impact of various state income taxes. The 44.6% effective tax in 2017 reflected a 34% federal tax rate and the impact of taxes related to European operations which were exited in 2017. It also reflected the impact of various state income taxes.

First nine months 2018 to first nine months 2017

Net Income: Income from continuing operations before income taxes increased to \$111.0 million in the first nine months of 2018 from \$30.2 million in the first nine months of 2017. Net income from continuing operations for the first nine months of 2018 was \$81.5 million, or \$1.44 per diluted share, compared to \$30.7 million, or \$0.55 per diluted share for the first nine months of 2017. Net income from continuing operations increased between those respective periods as a result of the \$65.0 million gain on sale of our IRA portfolio in July 2018, higher net interest income and payments related fees, higher gains on loans originated for sale and lower non-interest expense. The increase in net income also reflected the impact of a 21% statutory federal tax rate in 2018 compared to a 34% rate in 2017. After discontinued operations, net income for the first nine months of 2018 was \$81.6 million compared to \$34.1 million for the first nine months of 2017. Net interest income increased \$10.2 million to \$90.2 million for the first nine months of 2018 compared to \$80.0 million for the first nine months of 2017 primarily as a result of higher loan balances, and higher yields which reflected the impact of the Federal Reserve's rate increases. The provision for loan and lease losses increased \$510,000 to \$2.7 million in the first nine months of 2018 compared to \$2.2 million in the first nine months of 2017. Non-interest income increased \$67.3 million (excluding security gains and losses), from \$69.8 million to \$137.1 million between those respective periods. The increase reflected a \$65.0 million gain on sale of our IRA portfolio in 2018. In 2017, a \$2.5 million gain on the sale of our health savings accounts was more than offset by a loss of \$3.4 million on the sale of our European prepaid operations. Non-interest expense decreased \$5.4 million between the periods, which reflected decreases of \$3.3 million in data processing expense and \$472,000 in telecom and IT network communications expense. Non-interest expense in 2017 reflected a \$2.5 million civil money penalty. Diluted income per share was \$1.43 for the first nine months of 2018 compared to diluted income per share of \$0.61 for the first nine months of 2017.

Net Interest Income: Our net interest income for the first nine months of 2018 increased to \$90.2 million, an increase of \$10.2 million, or 12.8%, from \$80.0 million in the first nine months of 2017. Our interest income for the first nine months of 2018 increased to \$109.3 million, an increase of \$18.1 million, or 19.9%, from \$91.2 million for the first nine months of 2017. The increase in interest income resulted primarily from higher balances of loans and higher yields. Our average loans and leases increased \$177.3 million, or 10.1%, to \$1.94 billion for the first nine months of 2018 from \$1.76 billion for the first nine months of 2017, while related interest income increased \$11.0 million on a tax equivalent basis. The increase in average loans reflected growth in SBLOC, SBA and leasing. Our average investment securities increased to \$1.40 billion for the first nine months of 2018 from \$1.28 billion for the first nine months of 2017 while related interest income increased \$4.2 million on a tax equivalent basis as a result of those higher balances and higher yields. Yields on both loans and investment securities increased as a result of the impact of the Federal Reserve's rate increases on variable rate loans and securities. While interest income increased by the aforementioned \$10.2 million, interest expense increased by \$7.9 million, as deposits also repriced to the higher rate environment. As a result of the sale of the safe harbor deposit portfolio in July 2018, we believe that in the short term, interest income on balances at the Federal Reserve Bank will decrease and interest expense on deposits will increase.

Our net interest margin (calculated by dividing net interest income by average interest earning assets) for the first nine months of 2018 increased to 3.15% from 3.02% in the first nine months of 2017, an increase of 13 basis points. The increase in the net interest margin reflected higher yields on loans and investment securities, reflecting the aforementioned Federal Reserve increases. In the first nine months of 2018, the average yield on our loans increased to 4.83% from 4.46% for the first nine months of 2017, an increase of 37 basis points. Yields on taxable investment securities were higher at 3.01% compared to 2.83%, an increase of 18 basis points. Average interest earning deposits at the Federal Reserve Bank decreased \$63.5 million, or 11.9%, to \$468.7 million in the first nine months of 2018 from \$532.2 million in the first nine months of 2017. The reduction reflected lower seasonal tax refund deposits in the first quarter of the year resulting from the exit from one of our program managers of a tax preparation software company. The interest cost of total deposits and interest bearing liabilities increased to 0.64% for the first nine months of 2018 compared to 0.38% in the first nine months of 2017. As a result of the sale of the safe harbor IRA deposit portfolio in July 2018, we believe that in the short term, the interest cost of deposits will increase.

Average Daily Balances. The following table presents the average daily balances of assets, liabilities and shareholders' equity and the respective interest earned or paid on interest-earning assets and interest-bearing liabilities, as well as average annualized rates, for the periods indicated:

	Nine months ended September 30,

* Full taxable equivalent basis, using a statutory tax rate of 21% for 2018 and 35% for 2017, respectively.

** Includes loans held for sale.

For the first nine months of 2018, average interest earning assets increased to \$3.87 billion, an increase of \$233.6 million, or 6.4%, from \$3.64 billion in the first nine months of 2017. The increase reflected increased average balances of loans and leases of \$177.3 million, or 10.1%, increased average investment securities of \$115.7 million, or 9.0%, and decreased average balances of interest earning deposits at the Federal Reserve Bank of \$63.5 million, or 11.9%. Average demand and interest checking deposits increased \$30.7 million, or 0.9%. The small increase resulted from daily fluctuations in these balances.

Provision for Loan and Lease Losses. Our provision for loan and lease losses increased \$510,000 to \$2.7 million for the first nine months of 2018 compared to \$2.2 million for the first nine months of 2017. The increase in the provision is based on our evaluation of the adequacy of our allowance for loan and leases losses, particularly in light of current economic conditions. At September 30, 2018, our allowance for loan and lease losses amounted to \$8.1 million, or 0.54%, of total loans compared to \$7.1 million, or 0.51% of total loans at December 31, 2017. For more information about our provision and allowance for loan and lease losses and our loss experience, see “Financial Condition-Allowance for loan and lease losses”, “-Net charge-offs,” and “-Non-performing loans, loans 90 days delinquent and still accruing, and troubled debt restructurings,” below and Note 6 to the financial statements.

Non-Interest Income. Non-interest income was \$137.1 million in the first nine months of 2018 compared to \$69.8 million in the first nine months of 2017, before gains on securities of \$41,000 in the first nine months of 2018 and \$1.6 million in the first nine months of 2017. The \$67.3 million, or 96.4%, increase between those respective periods reflected a \$65 million gain on sale of IRA portfolio and a \$2.7 million increase in gain on sale of loans originated for sale reflecting a higher volume of sales in the 2018 securitizations. It also reflected a \$4.0 million increase in payment related fees which include prepaid, card payment and ACH fees. Offsetting these increases was a \$3.0 million reduction in change in value of investment in unconsolidated entity. The majority of that reduction resulted from a \$1.7 million charge in the third quarter of 2018, resulting primarily from an appraisal of properties securing one borrower’s loans, as a result of non-payment of required loan payments for the third quarter of 2018. In the third quarter of 2017 we had a \$2.5 million gain on the sale of a portion of our health savings portfolio which was more than offset by a \$3.4 million loss on the sale of our European prepaid card operations. Prepaid card fees increased \$2.3 million, or 5.8%, to \$41.6 million for the first nine months of 2018 from \$39.3 million for the first nine months of 2017. The increase reflected higher transactional volume. Card payment and ACH processing fees increased \$1.7 million, or 36.5%, to \$6.3 million for the first nine months of 2018 compared to \$4.6 million for the first nine months of 2017. The increase resulted from an increase in transaction volume including fees earned from a new payment service which permits payment transfers in minutes, instead of days. Leasing income increased \$265,000, or 12.7%, to \$2.4 million for the first nine months of 2018 from \$2.1 million for the first nine months of 2017, which reflected higher gains on disposition of leased vehicles in 2018. Affinity fees decreased \$1.2 million, or 81.2%, to \$271,000 for the first nine months of 2018 from \$1.4 million for the first nine months of 2017. The decrease resulted primarily from the planned exit of one affinity relationship which had a change of ownership. Service fees on deposit accounts decreased \$1.3 million, or 26.0%, to \$3.6 million for the first nine months of 2018 from \$4.9 million for the first nine months of 2017 reflecting decreases in service charges due to the sale of the IRA portfolio in 2018. In July 2018, the IRA portfolio was sold which will result in the elimination of the vast majority of service fees on deposit accounts. Other non-interest income decreased \$203,000, or 22.8%, to \$689,000 in the first nine months of 2018 from \$892,000 in the first nine months of 2017.

Non-Interest Expense. Total non-interest expense was \$113.7 million for the first nine months of 2018, a decrease of \$5.4 million, or 4.5%, from \$119.0 million for the first nine months of 2017. In 2017, non-interest expense included a \$2.5 million civil money penalty. Salaries and employee benefits expense increased to \$59.2 million, an increase of \$1.3 million, or 2.3%, from \$57.9 million for the first nine months of 2017. The increase reflected increases in BSA and compliance staffing costs. Depreciation and amortization decreased \$393,000, or 11.5%, to \$3.0 million in the first nine months of 2018 from \$3.4 million in the first nine months of 2017 which reflected reduced spending on fixed assets and equipment. Rent and occupancy decreased \$150,000, or 3.5%, to \$4.1 million in the first nine months of 2018 from \$4.2 million in the first nine months of 2017. The decrease reflected a reduction in leased space and more efficient use of office space. Data processing expense decreased \$3.3 million, or 41.1%, to \$4.7 million in the first nine months of 2018 from \$8.0 million in the first nine months of 2017. The decrease reflected the impact of a renegotiated data processing contract and lower account and transaction volume as a result of the planned exit of an affinity program which had an ownership change. Printing and supplies decreased \$341,000, or 30.4%, to \$779,000 in the first nine months of 2018 from \$1.1 million in the first nine months of 2017, which reflected a reduction in printing expense for health savings accounts which were sold in the second quarter of 2017. Audit expense increased \$283,000, or 22.3%, to \$1.6 million in the first nine months of 2018 from \$1.3 million in the first nine months of 2017 which reflected increased regulatory and tax compliance audit fees. Legal expense decreased \$98,000, or 1.7%, to \$5.8 million for the first nine months of 2018 from \$5.9 million in the first nine months of 2017, which reflected decreased costs associated with an SEC subpoena related to the restatement of the financial statements (see “Financial Statements Restatement”) and other regulatory related legal fees. Amortization of intangible assets increased \$15,000, or 1.3%, to \$1.1 million for the first nine months of 2018 from \$1.1 million for the first nine months of 2017. FDIC insurance expense decreased \$197,000, or 2.6%, to \$7.4 million for the first nine months of 2018 from \$7.6 million in the first nine months of 2017, which reflected the impact of a decrease in the FDIC assessment rate. Software expense increased \$551,000, or 5.9% to \$9.9 million in the first nine months of 2018 from \$9.3 million in the first nine months of 2017 which reflected additional information technology infrastructure to improve efficiency and scalability, including BSA software required to satisfy regulatory requirements. Insurance expense increased \$114,000, or 6.2%, to \$2.0 million in the first nine months of 2018 from \$1.9 million in the first nine months of 2017. The increase reflected the impact of increased limits for liability coverages. Telecom and IT network communications expense decreased \$472,000, or 32.7%, to \$971,000 in the first nine months of 2018 from \$1.4 million in the first nine months of 2017. The decrease reflected cost cutting efforts which included the elimination of corporate sponsored cell phones. Consulting expense increased \$913,000, or 52.3%, to \$2.7 million in the first nine months of 2018 from \$1.7 million in the first nine months of 2017, reflecting increased BSA and other regulatory consulting. Lease termination expense of \$395,000 resulted from the termination of a lease which should yield future savings. Other non-interest expense decreased \$96,000, or 0.9%, to \$10.3 million in the first nine months of 2018 from \$10.4 million in the first nine months of 2017. The \$96,000 decrease reflected increases of \$506,000 in travel, which was more than offset by \$643,000 of reductions in fraud losses.

Income Taxes. Income tax expense for continuing operations was \$29.6 million for the first nine months of 2018 compared to income tax benefit of \$457,000 in the first nine months of 2017. A 26.6% effective tax rate in 2018 reflected the reduced 21% federal tax rate effective in that year, compared to the prior year federal rate of 34%. The tax benefit in 2017 reflected the impact of deferred tax valuation reversals.

Liquidity and Capital Resources

Liquidity defines our ability to generate funds to support asset growth, meet deposit withdrawals, satisfy borrowing needs and otherwise operate on an ongoing basis. We invest the funds we do not need for daily operations primarily in overnight federal funds or in our interest-bearing account at the Federal Reserve.

Our primary source of funding has been deposits. In 2017, we exited deposit relationships to reduce excess balances at the Federal Reserve which earn relatively low rates of interest. While such exits reduced balances in the third quarter of 2018, they were offset by growth in prepaid card and other payments deposit accounts. Interest-bearing balances at the Federal Reserve Bank, maintained on an overnight basis, averaged \$445.8 million for the third quarter of 2018, compared to the prior year third quarter average of \$366.7 million. On October 1, 2018, we transferred approximately \$200 million of funds to their acquirer after the third quarter sale of our IRA portfolio. The amounts were transferred from interest bearing balances at the Federal Reserve Bank. The exits of deposit relationships in 2017 and 2018, continue a trend of exits in previous years, resulting from deposit growth which has exceeded liquidity requirements.

Investment securities available-for-sale provide a primary source of balance sheet liquidity. In excess of \$800 million of our investments are issued by U.S. government agencies which are highly liquid and may be pledged as collateral for our FHLB line of credit. Loan repayments, also a source of funds, were exceeded by new loan disbursements during the first nine months of 2018.

While we do not have a traditional branch system, we believe that our core deposits, which include our demand, interest checking, savings and money market accounts, have similar characteristics to those of a bank with a branch system. The majority of our deposit accounts are obtained with the assistance of third parties and as a result are classified as brokered by the FDIC. The FDIC guidance for classification of deposit accounts as brokered is relatively broad, and generally includes accounts which were referred to or “placed” with the institution by other companies. If the Bank ceases to be categorized as “well capitalized” under banking regulations, it will be prohibited from accepting, renewing or rolling over brokered deposits without the consent of the FDIC. In such a case, the FDIC’s refusal to grant consent to our accepting, renewing or rolling over brokered deposits could effectively restrict or eliminate the ability of the Bank to operate its business lines as presently conducted.

We focus on customer service which we believe has resulted in a history of customer loyalty. Stability, low cost and customer loyalty comprise key characteristics of core deposits which we believe are comparable to core deposits of peers with branch systems. As a result of the stability and low cost of our transaction account deposits, we have not, unlike peers, required the use of more costly and volatile certificates of deposit. However, certain components of our deposits do experience seasonality, creating greater excess liquidity at certain times. The largest deposit inflows occur in the first quarter of the year when certain of our accounts are credited with tax refund payments from the U.S. Treasury.

While consumer transaction accounts including prepaid accounts comprise the vast majority of our funding needs, we maintain secured borrowing lines with the Federal Home Loan Bank, or the FHLB, and the Federal Reserve. As of September 30, 2018, we had a \$1.03 billion line of credit with the Federal Reserve, which may be collateralized by various types of loans and securities. We have never used the Federal Reserve line of credit, which as a matter of that institution’s policy, is available for limited periods in times of financial stress. We may access our line of credit with the FHLB after pledging U.S. government agency securities, which is permitted at any time, to allow daily access to the line. As of September 30, 2018, we had eligible securities which would result in more than \$800 million of availability. As of September 30, 2018, we had no amounts outstanding on these borrowing lines. We expect to continue to maintain our facilities with the FHLB and Federal Reserve. We actively monitor our positions and contingent funding sources daily.

As a holding company conducting substantially all of our business through our subsidiaries, our need for liquidity consists principally of cash needed to make required interest payments on our trust preferred securities. As of September 30, 2018, we had cash reserves of approximately \$14.4 million at the holding company. Current quarterly interest payments on the \$13.4 million of trust preferred securities are approximately \$190,000 based on a floating rate of 3.25% over LIBOR. We expect that when the conditions under which the amendment to the 2014 Consent Order was issued are remediated, the FDIC and Federal Reserve will permit the Bank to resume paying dividends to us to fund holding company operations. There can, however, be no assurance that the FDIC will, in fact, allow the resumption of Bank dividends to us at the end of that period or at all and, accordingly, there is risk that we will need to obtain alternate sources of funding. There can be no assurance that such sources would be available to us on acceptable terms or at all.

Included in our cash and cash-equivalents at September 30, 2018 were \$710.8 million of interest earning deposits which primarily consisted of deposits with the Federal Reserve and included deposits for reserve requirements.

Deposit funding was utilized for net loan growth of \$106.4 million for the nine months ended September 30, 2018, and \$152.5 million for the nine months ended September 30, 2017. Net purchases of investment securities for the nine months ended September 30, 2018, were \$27.5 million compared to net redemptions of \$87.2 million for the prior year. We had outstanding commitments to fund loans, including unused lines of credit, of \$1.70 billion and \$1.45 billion as of September 30, 2018 and December 31, 2017, respectively. The majority of our commitments originate with security backed lines of credit. Such commitments are normally based on the full amount of collateral in a customer's investment account. However, such commitments have historically been drawn at only a fraction of the total commitment. The funding requirements for such commitments occur on a measured basis over time and would be funded by normal deposit growth.

We must comply with capital adequacy guidelines issued by the FDIC. A bank must, in general, have a Tier 1 leverage ratio of 5.00%, a ratio of Tier I capital to risk-weighted assets of 8.0%, a ratio of total capital to risk-weighted assets of 10.0% and a ratio of common equity tier 1 to risk weighted assets of 6.5% to be considered "well capitalized." The Tier 1 leverage ratio is the ratio of Tier 1 capital to average assets for the period. "Tier I capital" includes common shareholders' equity, certain qualifying perpetual preferred stock and minority interests in equity accounts of consolidated subsidiaries, less intangibles. At September 30, 2018, we were "well capitalized" under banking regulations.

The following table sets forth our regulatory capital amounts and ratios for the periods indicated:

	Tier 1 capital to average assets ratio	Tier 1 capital to risk-weighted assets ratio	Total capital to risk-weighted assets ratio	Common equity tier 1 to risk weighted assets
<u>As of September 30, 2018</u>				
The Bancorp, Inc.	9.61%	23.94%	24.41%	23.94%
The Bancorp Bank	9.19%	23.79%	24.28%	23.79%
"Well capitalized" institution (under FDIC regulations-Basel III)	5.00%	8.00%	10.00%	6.50%
<u>As of December 31, 2017</u>				
The Bancorp, Inc.	7.90%	16.73%	17.09%	16.73%
The Bancorp Bank	7.61%	16.23%	16.59%	16.23%
"Well capitalized" institution (under FDIC regulations)	5.00%	8.00%	10.00%	6.50%

Asset and Liability Management

The management of rate sensitive assets and liabilities is essential to controlling interest rate risk and optimizing interest margins. An interest rate sensitive asset or liability is one that, within a defined time period, either matures or experiences an interest rate change in line with general market rates. Interest rate sensitivity measures the relative volatility of an institution's interest margin resulting from changes in market interest rates.

We monitor, manage and control interest rate risk through a variety of techniques, including use of traditional interest rate sensitivity analysis (also known as "gap analysis") and an interest rate risk management model. With the interest rate risk management model, we project future net interest income and then estimate the effect of various changes in interest rates and balance sheet growth rates on that projected net interest income. We also use the interest rate risk management model to calculate the change in net portfolio value over a range of interest rate change scenarios. Traditional gap analysis involves arranging our interest earning assets and interest bearing liabilities by repricing periods and then computing the difference (or "interest rate sensitivity gap") between the assets and liabilities that we estimate will reprice during each time period and cumulatively through the end of each time period.

Both interest rate sensitivity modeling and gap analysis are done at a specific point in time and involve a variety of significant estimates and assumptions. Interest rate sensitivity modeling requires, among other things, estimates of how much and when yields and costs on individual categories of interest earning assets and interest bearing liabilities will respond to general changes in market rates, future cash flows and discount rates. Gap analysis requires estimates as to when individual categories of interest-sensitive assets and liabilities will reprice, and assumes that assets and liabilities assigned to the same repricing period will reprice at the same time and in the same amount. Gap analysis does not account for the fact that repricing of assets and liabilities is discretionary and subject to competitive and other pressures. A gap is considered positive when the amount of interest rate sensitive assets exceeds the amount of interest rate sensitive liabilities. A gap is considered negative when the amount of interest rate sensitive liabilities exceeds interest rate sensitive assets. During a period of falling interest rates, a positive gap would tend to adversely affect net interest income, while a negative gap would tend to result in an increase in net interest income. During a period of rising interest rates, a positive gap would tend to result in an increase in net interest income while a negative gap would tend to affect net interest income adversely.

The following table sets forth the estimated maturity or repricing structure of our interest earning assets and interest bearing liabilities at September 30, 2018. We estimate the repricing characteristics of deposits based on historical performance, past experience at other institutions and other deposit behavior assumptions. However, we may choose not to reprice liabilities proportionally to changes in market interest rates for competitive or other reasons. The table does not assume any prepayment of bank loans. Mortgage-backed and other callable securities are scheduled based on their anticipated cash flow, including prepayments based on historical data and current market trends. The table does not necessarily indicate the impact of general interest rate movements on our net interest income because the repricing of certain categories of assets and liabilities is beyond our control as, for example, prepayments of loans and withdrawal of deposits. As a result, certain assets and liabilities indicated as repricing within a stated period may in fact reprice at different times and at different rate levels.

	1-90 Days	91-364 Days	1-3 Years	3-5 Years	Over 5 Years
(dollars in thousands)					
Interest earning assets:					
Commercial loans held for sale	\$ 143,246	\$ 16,535	\$ 42,523	\$ 11,188	\$ 94,977
Loans net of deferred loan costs	1,017,456	48,995	239,246	170,762	20,314
Investment securities	460,304	51,333	158,204	295,413	393,596
Interest earning deposits	710,816	-	-	-	-
Securities purchased under agreements to resell	64,518	-	-	-	-
Total interest earning assets	2,396,340	116,863	439,973	477,363	508,887
Interest bearing liabilities:					
Demand and interest checking	2,297,830	60,889	60,889	-	-
Savings and money market	79,363	158,727	79,363	-	-
Securities sold under agreements to repurchase	158	-	-	-	-

Total interest bearing liabilities	2,390,752	219,616	140,252	-	-
Gap	\$ 5,588	\$ (102,753)	\$ 299,721	\$ 477,363	\$ 508,887
Cumulative gap	\$ 5,588	\$ (97,165)	\$ 202,556	\$ 679,920	\$ 1,188,807
Gap to assets ratio	*	-2%	7%	11%	12%
Cumulative gap to assets ratio	*	-2%	5%	16%	27%

* While demand deposits are non-interest bearing, related fees paid to affinity groups may reprice according to specified indices.

The methods used to analyze interest rate sensitivity in this table have a number of limitations. Certain assets and liabilities may react differently to changes in interest rates even though they reprice or mature in the same or similar time periods. The interest rates on certain assets and liabilities may change at different times than changes in market interest rates, with some changing in advance of changes in market rates and some lagging behind changes in market rates. Additionally, the actual prepayments and withdrawals we experience when interest rates change may deviate significantly from those assumed in calculating the data shown in the table. Accordingly actual results can and often do differ from projections.

Financial Condition

General. Our total assets at September 30, 2018 were \$4.36 billion, of which our total loans were \$1.50 billion. At December 31, 2017, our total assets were \$4.71 billion, of which our total loans were \$1.39 billion. The decrease in assets reflected seasonally higher gift card balances at December 31, 2017.

Interest earning deposits and federal funds sold. At September 30, 2018, we had a total of \$710.8 million of interest earning deposits compared to \$841.5 million at December 31, 2017, a decrease of \$130.7 million or 15.5%. These deposits were comprised primarily of balances at the Federal Reserve, which pays interest on such balances. The reduction reflected the aforementioned seasonally higher gift card balances at December 31, 2017, some of which are maintained at the Federal Reserve.

Investment portfolio. For detailed information on the composition and maturity distribution of our investment portfolio, see Note 5 to the Financial Statements. Total investment securities decreased to \$1.36 billion at September 30, 2018, a decrease of \$22.0 million, or 1.6%, from year-end 2017. Other securities included in the held-to-maturity classification at September 30, 2018, consisted of three securities secured by diversified portfolios of corporate securities and one single-issuer trust preferred security.

A total of \$9.1 million of other debt securities - single issuers is comprised of the amortized cost of one single-issuer trust preferred security issued by an insurance company.

A total of \$75.2 million of other debt securities – pooled is comprised of three securities consisting of diversified portfolios of corporate securities.

The following table provides additional information related to our single issuer trust preferred securities as of September 30, 2018 (in thousands):

<u>Single issuer</u>	<u>Book value</u>	<u>Fair value</u>	<u>Unrealized gain/(loss)</u>	<u>Credit rating</u>
Security A	9,155	7,388	(1,767)	Not rated

Under the accounting guidance related to the recognition of other-than-temporary impairment charges on debt securities, an impairment on a debt security is deemed to be other-than-temporary if it meets the following conditions: (i) we intend to sell or it is more likely than not we will be required to sell the security before a recovery in value, or (ii) we do not expect to recover the entire amortized cost basis of the security. If we intend to sell or it is more likely than not we will be required to sell the security before a recovery in value, a charge is recorded in net realized capital losses equal to the difference between the fair value and amortized cost basis of the security. For those other-than-temporarily impaired debt securities which do not meet the first condition and for which we do not expect to recover the entire amortized cost basis, the difference between the security's amortized cost basis and the fair value is separated into the portion representing a credit impairment, which is recorded in net realized capital losses, and the remaining impairment, which is recorded in other comprehensive income. Generally, a security's credit impairment is the difference between its amortized cost basis and the best estimate of its expected future cash flows discounted at the security's effective yield prior to impairment. The previous amortized cost basis less the impairment recognized in net realized capital losses becomes the security's new cost basis. For the nine months ended September 30, 2018 and September 30, 2017, we recognized no other-than-temporary impairment charges related to trust preferred securities classified in our held-to-maturity portfolio.

Investments in Federal Home Loan and Atlantic Central Bankers Bank stock are recorded at cost and amounted to \$1.1 million at September 30, 2018, compared to \$991,000 at December 31, 2017.

Investment securities with a fair value of approximately \$723,000 at September 30, 2018 and \$310.9 million at December 31, 2017, were pledged as collateral to secure a line of credit with the Federal Home Loan Bank. At September 30, 2018, and December 31, 2017, investment securities with a fair value of approximately \$170.3 million and \$225.6 million, respectively, were pledged to secure a line of credit with the Federal Reserve Bank.

Loans held for sale. Loans held for sale are comprised of commercial mortgage loans and SBA loans originated for sale or securitization in the secondary market. The fair value of commercial mortgage loans and the SBA loans originated for sale is based on purchase commitments, quoted prices for the same or similar loans or fair market valuations based on other market information on an individual loan basis. Commercial loans held for sale decreased to \$308.5 million at September 30, 2018 from \$503.3 million at December 31, 2017. The decrease resulted from the sale of loans into a securitization at the end of the third quarter, partially offset by new loans originated for sale in a future securitization.

Loan portfolio. Total loans increased to \$1.50 billion at September 30, 2018 from \$1.39 billion at December 31, 2017.

The following table summarizes our loan portfolio, not including loans held for sale, by loan category for the periods indicated (in thousands):

	September 30, 2018	December 31, 2017
SBA non-real estate	\$ 74,408	\$ 70,379
SBA commercial mortgage	166,432	142,086
SBA construction	17,978	16,740
SBA loans *	258,818	229,205
Direct lease financing	395,976	377,660
SBLOC	778,552	730,462
Other specialty lending	40,799	30,720
Other consumer loans	12,172	14,133
	1,486,317	1,382,180
Unamortized loan fees and costs	10,456	10,048
Total loans, net of deferred loan fees and costs	\$ 1,496,773	\$ 1,392,228

*The following table shows SBA loans and SBA loans held for sale at the dates indicated (in thousands):

	September 30, 2018	December 31, 2017
SBA loans, including deferred fees and costs	\$ 266,433	\$ 236,724
SBA loans included in held for sale	193,372	165,177
Total SBA loans	\$ 459,805	\$ 401,901

Allowance for loan and lease losses. We review the adequacy of our allowance for loan and lease losses on at least a quarterly basis to determine that the provision for loan losses is made in an amount necessary to maintain our allowance at a level that is appropriate, based on management's estimate of inherent losses. Our estimates of loan and lease losses are intended to, and, in management's opinion, do, meet the criteria for accrual of loss contingencies in accordance with ASC 450, "Contingencies", and ASC 310, "Receivables". The process of evaluating this adequacy has two basic elements: first, the identification of problem loans or leases based on current financial information and the fair value of the underlying collateral; and second, a methodology for estimating general loss reserves. For loans or leases classified as "special mention," "substandard" or "doubtful," we reserve all losses inherent in the portfolio at the time we classify the loan or lease. This "specific" portion of the allowance is the total of potential, although unconfirmed, losses for individually classified loans. In this process, we establish specific reserves based on an analysis of the most probable sources of repayment and liquidation of collateral. While each impaired loan is individually evaluated, not every loan requires a reserve when the collateral value and estimated cash flows exceed the current balance. When loans are classified as troubled debt restructurings, their collateral is valued and a specific reserve is established if the collateral valuation, less disposition costs, is lower than the recorded value of the loan. At September 30, 2018 there were ten troubled debt restructured loans with a balance of \$2.4 million which had specific reserves of \$771,000. Approximately \$576,000 of these reserves related to the non-guaranteed portion of SBA loans for start-up businesses with the balance attributable to leasing.

The second phase of our analysis represents an allocation of the allowance. This methodology analyzes pools of loans that have similar characteristics and applies historical loss experience and other factors for each pool including management's experience with similar loan and lease portfolios at other institutions, the historic loss experience of our peers and a review of statistical information from various industry reports to determine the allocable portion of the allowance. This estimate is intended to represent the potential unconfirmed and inherent losses within the portfolio. Individual loan pools are created for the following major loan categories: SBLOCs, SBA loans, direct lease financing and other specialty lending and consumer loans. We augment historical experience for each loan pool by accounting for such items as current economic conditions, current loan portfolio performance, loan policy or management changes, loan concentrations, increases in our lending limit, average loan size and other factors as appropriate. Our Chief Credit Officer oversees the loan review department processes and measures the adequacy of the allowance for loan and lease losses independently of loan production officers. A description of loan review coverage targets is set forth below.

At September 30, 2018, the allowance for loan losses amounted to \$8.1 million which represented a \$1.0 million increase over the \$7.1 million at December 31, 2017. The increase resulted primarily from higher net charge-offs on the non-guaranteed portion of SBA loans. These increased charge offs reflected losses on start-up business loans, which present a higher risk of default. Additionally, lease charge-offs increased, with both categories contributing to the increase in the allowance.

At September 30, 2018, in excess of 50% of the total continuing loan portfolio had been reviewed as a result of the coverage of each loan portfolio type. The targeted coverages and scope of the reviews are risk-based and vary according to each portfolio. These thresholds are maintained as follows:

Securities Backed Lines of Credit (SBLOC) – The targeted review threshold for 2018 is 40%, with the largest 25% of SBLOCs by commitment to be reviewed annually. A random sampling of a minimum of 20 of the remaining loans will be reviewed each quarter. At September 30, 2018, approximately 50% of the SBLOC portfolio had been reviewed.

SBA Loans – The targeted review threshold for 2018 is 100%, to be reviewed within 90 days of funding, less guaranteed portions of any purchased loans. The 100% coverage includes loan review work performed by designated SBA department personnel. At September 30, 2018, approximately 100% of the government guaranteed loan portfolio had been reviewed. The loan balance review threshold is \$1.0 million.

Leasing – The targeted review threshold for 2018 million is 35%. At September 30, 2018, approximately 57% of the leasing portfolio had been reviewed. The loan balance review threshold is \$1.0 million.

CMBS (Floating Rate) – The targeted review threshold for 2018 is 100%. Floating rate loans will be reviewed initially within 90 days of funding and will be monitored on an ongoing basis as to payment status. Subsequent reviews will be performed based on a sampling each quarter. Each floating rate loan will be reviewed if any available extension options are exercised. At September 30, 2018, approximately 100% of the CMBS floating rate loans on the books for more than 90 days had been reviewed.

CMBS (Fixed Rate) – 100% of fixed rate loans that are unable to be readily sold on the secondary market and remain on the Bank's books after nine months will be reviewed at least annually. At September 30, 2018, 100% of the CMBS fixed rate portfolio had been reviewed.

Specialty Lending – Specialty Lending, defined as commercial loans unique in nature that do not fit into other established categories, will have a review coverage threshold of 100% for non-Community Reinvestment Act (“CRA”) loans. At September 30, 2018, approximately 100% of the non-CRA loans had been reviewed.

Home Equity Lines of Credit (HELOC) – The targeted review threshold for 2018 is 50%. The largest 25% of HELOCs by commitment will be reviewed annually. A random sampling of a minimum of ten of the remaining loans will be reviewed each quarter. At September 30, 2018, approximately 86% of the HELOC portfolio had been reviewed.

The following tables present delinquencies by type of loan as follows as of the dates specified (in thousands):

September 30, 2018	30-59 Days past due	60-89 Days past due	90 Days or greater	Non-accrual	Total past due	Current	Total loans

Although we consider our allowance for loan and lease losses to be adequate based on information currently available, future additions to the allowance may be necessary due to changes in economic conditions, our ongoing loss experience and that of our peers, changes in management's assumptions as to future delinquencies, recoveries and losses, deterioration of specific credits and management's intent with regard to the disposition of loans and leases.

The following table summarizes select asset quality ratios for each of the periods indicated:

	As of or for the nine months ended September 30,	
	2018	2017
Ratio of the allowance for loan losses to total loans	0.54%	0.53%
Ratio of the allowance for loan losses to non-performing loans *	154.16%	137.23%
Ratio of non-performing assets to total assets *	0.13%	0.13%
Ratio of net charge-offs to average loans	0.09%	0.07%
Ratio of net charge-offs to average loans annualized	0.11%	0.09%

* Includes loans 90 days past due still accruing interest.

The ratio of the allowance for loan and lease losses to total loans was 0.54% at September 30, 2018 which was comparable to the 0.53% at September 30, 2017. The ratio of the allowance for loan losses to non-performing loans increased to 154.16% at September 30, 2018, from 137.23% at September 30, 2017, primarily as a result of an increase in the allowance. The ratio of non-performing assets to total assets remained the same at 0.13% for both September 30, 2018 and September 30, 2017, with the impact of a modest increase in non-performers offset by a modest increase in assets. Net charge-offs to average loans increased to 0.09% for the nine months ended September 30, 2018, from 0.07% for the nine months ended September 30, 2017, primarily as a result of higher net charge offs, primarily in the non-guaranteed portion of non-real estate secured SBA loans.

Net charge-offs. Net charge-offs were \$1.7 million for the nine months ended September 30, 2018, an increase of \$465,000 from net charge-offs of \$1.2 million the same period of 2017. The majority of the charge-offs in 2018 were associated with the non-guaranteed portion of non-real estate SBA loans while in 2017 the majority of charge-offs resulted from leasing relationships.

Non-performing loans, loans 90 days delinquent and still accruing, and troubled debt restructurings. Loans are considered to be non-performing if they are on a non-accrual basis or they are past due 90 days or more and still accruing interest. A loan which is past due 90 days or more and still accruing interest remains on accrual status only when it is both adequately secured as to principal and interest, and is in the process of collection. Troubled debt restructurings are loans with terms that have been renegotiated to provide a reduction or deferral of interest or principal because of a weakening in the financial positions of the borrowers. The following tables summarize our non-performing loans, other real estate owned and loans past due 90 days or more still accruing interest (in thousands).

	September 30, 2018	December 31, 2017
Non-accrual loans		
SBA non-real estate	\$ 2,433	\$ 1,889
SBA commercial mortgage	458	693
Consumer	1,343	1,414
Total non-accrual loans	4,234	3,996
Loans past due 90 days or more	1,015	227
Total non-performing loans	5,249	4,223
Other real estate owned	405	450
Total non-performing assets	\$ 5,654	\$ 4,673

Loans that were modified as of September 30, 2018 and December 31, 2017 and considered troubled debt restructurings are as follows (dollars in thousands):

	September 30, 2018			December 31, 2017		
	Number	Pre-modification recorded investment	Post- modification recorded investment	Number	Pre-modification recorded investment	Post- modification recorded investment
SBA non-real estate	5	\$ 719	\$ 719	5	\$ 1,476	\$ 1,476
Direct lease financing	3	1,125	1,125	1	230	230
Consumer	2	519	519	2	535	535
Total	10	\$ 2,363	\$ 2,363	8	\$ 2,241	\$ 2,241

The balances below provide information as to how the loans were modified as troubled debt restructurings loans at September 30, 2018 and December 31, 2017 (in thousands).

	September 30, 2018			December 31, 2017		
	Adjusted interest rate	Extended maturity	Combined rate and maturity	Adjusted interest rate	Extended maturity	Combined rate and maturity

	<u>\$ 5,475</u>	<u>\$ 6,414</u>	<u>\$ 1,914</u>	<u>\$ 6,058</u>	<u>\$ 114</u>

We had \$4.2 million of non-accrual loans at September 30, 2018 compared to \$4.0 million of non-accrual loans at December 31, 2017. The \$200,000 increase in non-accrual loans was primarily due to \$5.6 million of loans placed on non-accrual status partially offset by \$3.8 million of loan payments, \$1.2 million of charge-offs and \$364,000 of participations sold. Loans past due 90 days or more still accruing interest amounted to \$1.0 million at September 30, 2018 and \$227,000 at December 31, 2017. The \$773,000 increase reflected \$12.3 million of additions partially offset by \$10.2 million of loan payments, \$155,000 of charge-offs, \$1.1 million of loans moved to non-accrual and \$15,000 of loans moved to repossessed assets.

We had \$405,000 and \$450,000 of other real estate owned at September 30, 2018 and December 31, 2017, respectively. The reduction resulted from a \$45,000 writedown.

The following table classifies our loans (not including loans held for sale) by categories which are used throughout the industry as of September 30, 2018 and December 31, 2017 (dollars in thousands):

September 30, 2018	Pass	Special mention	Substandard	Doubtful	Loss	Unrated subject to review *	Unrated not subject to review *	Total loans
SBA non-real estate	\$ 66,964	\$ 2,592	\$ 3,873	\$ -	\$ -	\$ 21	\$ 958	\$ 74,408

* For information on targeted loan review thresholds see "Allowance for Loan Losses".

Premises and equipment, net. Premises and equipment amounted to \$17.7 million at September 30, 2018 compared to \$20.1 million at December 31, 2017. The decrease reflected depreciation and reduced purchases compared to prior periods.

Investment in Unconsolidated Entity. On December 30, 2014, the Bank entered into an agreement for, and closed on, the sale of a portion of its discontinued commercial loan portfolio. The purchaser of the loan portfolio was a newly formed entity, Walnut Street 2014-1 Issuer, LLC ("Walnut Street"). The price paid to the Bank for the loan portfolio, which had a face value of approximately \$267.6 million, was approximately \$209.6 million, of which approximately \$193.6 million was in the form of two notes issued by Walnut Street to the Bank; a senior note in the principal amount of approximately \$178.2 million bearing interest at 1.5% per year and maturing in December 2024 and a subordinate note in the principal amount of approximately \$15.4 million, bearing interest at 10.0% per year and maturing in December 2024. The balance of these notes comprise the \$64.2 million investment in unconsolidated entity at September 30, 2018.

Assets held for sale from discontinued operations. Assets held for sale as a result of discontinued operations, primarily commercial, commercial mortgage and construction loans, amounted to \$226.0 million at September 30, 2018 compared to \$304.3 million at December 31, 2017. The decrease resulted primarily from repayments, refinancings at other institutions and note sales. Non accrual loans in assets held for sale at September 30, 2018, included a loan which was reported in Form 10-Q for the quarterly period ended June 30, 2018. That loan had a \$17.0 million balance at June 30, 2018 and had become delinquent in the first quarter of 2018. The balance of that loan was paid down to \$16.4 million as of September 30, 2018. The loan is secured by multiple commercial real estate properties which were reappraised in third quarter 2018. The loan was written down to appraised values, and was accordingly marked down by \$1.7 million as of September 30, 2018. The borrowing entity has declared bankruptcy and the Bank is pursuing collection.

Deposits. Our primary source of funding is deposit acquisition. We offer a variety of deposit accounts with a range of interest rates and terms, including demand, checking and money market accounts. The majority of our deposits are generated through prepaid card and other payments related deposit accounts. One strategic focus is growing these accounts through affinity groups. At September 30, 2018, we had total deposits of \$3.86 billion compared to \$4.26 billion at December 31, 2017, a decrease of \$402.8 million or 9.5%. The decrease reflected higher balances at year end resulting from seasonal gift card balances. The following table presents the average balance and rates paid on deposits for the periods indicated (in thousands):

	For the nine months ended September 30, 2018		For the year ended December 31, 2017	
	Average balance	Average rate	Average balance	Average rate
Demand and interest checking *	\$ 3,463,756	0.60%	\$ 3,371,969	0.36%
Savings and money market	469,511	0.78%	439,625	0.51%
Total deposits	<u>\$ 3,933,267</u>	0.62%	<u>\$ 3,811,594</u>	0.38%

* Non-interest bearing demand accounts are not paid interest. The amount shown as interest reflects the fees paid to affinity groups, which are based upon a rate index, and therefore classified as interest expense.

Borrowings. At September 30, 2018, we had long-term borrowings of \$41.8 million compared to \$42.3 million at December 31, 2017. The borrowings consisted of sold loans which were accounted for as a secured borrowing because they did not qualify for true sale accounting. We do not have any policy prohibiting us from incurring debt.

Other liabilities. Other liabilities amounted to \$54.9 million at September 30, 2018 compared to \$67.2 million at December 31, 2017, representing a decrease of \$12.3 million. Other liabilities consist primarily of income tax payables and accrued expenses.

Off-balance sheet arrangements. There were no off-balance sheet arrangements during the nine months ended September 30, 2018 that have or are reasonably likely to have, a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to our interests.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Except as discussed in Item 2, “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” there has been no material change in our assessment of our sensitivity to market risk since our presentation in our Annual Report on Form 10-K for the year ended December 31, 2017.

Item 4. Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports under the Securities Exchange Act of 1934, as amended, or the Exchange Act, is recorded, processed, summarized, and reported within the time periods specified in the SEC’s rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. Members of our operational management and internal audit meet regularly to provide an established structure to report any weaknesses or other issues with controls, or any matter that has not been reported previously, to our Chief Executive Officer and Chief Financial Officer, and, in turn to the Audit Committee of our Board of Directors. In designing and evaluating the disclosure controls and procedures, our management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Under the supervision of our Chief Executive Officer and Chief Financial Officer, we have carried out an evaluation of the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective at the reasonable assurance level.

There has been no change in our internal control over financial reporting that occurred during the quarter ended September 30, 2018 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

For a discussion of certain regulatory proceedings involving the FDIC and FRB, see Part I, Item 2 “Management’s Discussion and Analysis of Financial Condition and Results of Operations-Financial Statement Restatement; Regulatory Actions”.

The Company received a subpoena from the SEC, dated March 22, 2016, relating to an investigation by the SEC of the Company's restatement of its financial statements for the years ended December 31, 2010 through December 31, 2013 and the interim periods ended March 31, 2014, September 30, 2014 and September 30, 2014, which restatement was filed with the SEC on September 28, 2015, and the facts and circumstances underlying the restatement. The Company is cooperating fully with the SEC's investigation. The costs to respond to the subpoena and cooperate with the SEC's investigation have been material, and we expect such costs to continue to be material at least through the completion of the SEC's investigation.

On July 16, 2018, certain investors in a hotel project of one of the Bank's former borrowers, 550 Seabreeze Development LLC (“Seabreeze Development”), filed an adversary action against the Bank and others in the United States Bankruptcy Court of the Southern District of Florida. The note for the related loan was sold in the second quarter of 2018 and the loan is no longer on the Bank's books. The adversary action was filed within the context of a Chapter 11 bankruptcy proceeding in which Seabreeze Development is the debtor, and alleged that the Bank and others defrauded the plaintiffs into investing a total of \$10.5 million in the project. Three causes of actions were asserted against the Bank: (i) fraud in the inducement; (ii) civil conspiracy; and (iii) aiding and abetting fraud. The Bank believed the claims were without merit and vigorously defended against them. On November 1, 2018, the bankruptcy court entered an order dismissing the claims against the Bank for lack of jurisdiction. The order further stated that the dismissal was without prejudice, and that the plaintiffs may file their causes of action in an appropriate forum.

In addition, we are a party to various routine legal proceedings arising out of the ordinary course of our business. Management believes that none of these actions, individually or in the aggregate, will have a material adverse effect on our financial condition or operations.

Section 2: EX-31.1 (EX-31.1)

Exhibit 31.1

CERTIFICATION

I, Damian Kozlowski, certify that:

1. I have reviewed this quarterly report on Form 10-Q for the quarterly period ended September 30, 2018 of The Bancorp, Inc. (the “Registrant”);

2. Based on my knowledge, this annual report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the consolidated financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Registrant as of, and for, the periods presented in this report;

4. The Registrant’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the Registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the Registrant’s internal control over financial reporting that occurred during the Registrant’s most recent fiscal quarter (the Registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the Registrant’s internal control over financial reporting.

5. The Registrant’s other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Registrant’s auditors and the audit committee of the Registrant’s board of directors (or persons performing the equivalent function):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Registrant’s ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

Section 3: EX-31.2 (EX-31.2)

Exhibit 31.2

CERTIFICATION

I, Paul Frenkiel, certify that:

1. I have reviewed this quarterly report on Form 10-Q for the quarterly period ended September 30, 2018 of The Bancorp, Inc. (the “Registrant”);

2. Based on my knowledge, this annual report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the consolidated financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Registrant as of, and for, the periods presented in this report;

4. The Registrant’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the Registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the Registrant’s internal control over financial reporting that occurred during the Registrant’s most recent fiscal quarter (the Registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the Registrant’s internal control

over financial reporting.

5. The Registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Registrant's auditors and the audit committee of the Registrant's board of directors (or persons performing the equivalent function):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the Registrant's internal control over financial reporting.
